This estimate of the quantity of water supplied to a consumer shall be based on, as the Executive Director: Infrastructure Services may decide —

- The average monthly consumption of water on the premises during any three consecutive metering periods during the twelve months period prior to the date on which the taking of the water mentioned above was discovered; or
- The average monthly consumption on the premises registered over three succeeding metered periods after the date of discovery of the way the water was taken.

11.3 Where a water meter becomes dysfunctional and ceases to register the quantity of water supplied to a consumer, the quantity of water supplied during the period between the date of the last reading of the water meter (prior to the reading consequent on which the failure was discovered) and the date of its repair or replacement, shall for purposes of determining a sewerage charge, be estimated, as the Executive Director: Infrastructure Services may decide, on either of the following basis —

- The average daily consumption of water registered by the water meter, which has ceased to register, calculated on the preceding three meter readings taken before the meter ceased to register;
- The average daily consumption of water registered by the replaced or repaired water meter, calculated on two successive meter readings taken after the repair or replacement of the defective water meter; or
- The consumption of water at the same water connection recorded for the corresponding period in the previous year.
