The increase to the income levels for this category of rebates is inflationary related.

(7) Special Cases

Various instances arise where the Council is requested to consider relief in respect of the payment of rates. This type of relief can be granted in terms of the rates policy to specified categories of property ownership.

In terms of the Rates Policy, those organisations and pensioners who continue to qualify for a rebate will be recorded on the billing system as a category of ownership. This will ensure that beneficial rating continues to apply to such property owners.

In the case of pensioners who own and leave in those properties the pensioner rebate benefit will be granted for four years or for the duration of the prevailing valuation roll. Pensioners will be required to reconfirm at the end of the four year period or at the end of the duration of the valuation roll for the continuation of pensioner rebate. Pensioners applying for extended social package are now required to complete the pensioner's application form in order to qualify for the pensioner rebate. The period of granting the ESP pensioners will be same as the ordinary pensioners.

(8) Determination of Property Values and Earning Levels for Property Owners for rebates based on Category of Ownership

Rates Policy allows for residential property owners who are retired to apply for pensioner rebate. It is necessary that the Council determines the appropriate cut off levels for the

application of such rebates for pensioners. It is proposed that the threshold be increase to R8 234 per month for the lower level and the ceiling of the upper level be increased to R14 116 per month.

The principle criteria are:

- (a) Minimum age: 60 years
- (b) Maximum property value: R2 000 000
(Market Value per the 2013 Valuation Roll and supplementary valuation rolls)
- (c) Gross monthly income for 100% rebate R8 234
- (d) Gross Monthly income for 50% rebate is R8 234 to R14 116
- (e) Pensioners over the age of seventy property value not more than R2 million.

It is proposed that pensioners continue to be afforded a 100% rebate on property rates where the gross income of the property owner is less or equal to R8, 234 per month over the previous income tax year. Where the income exceeds the lower limit, but does not exceed the upper limit of R14, 116 per month, the level of rebate shall be 50%. The maximum property value for pensioner's rebate purposes is R2 million for the duration of the valuation roll. The period for the exemption for the 60 year pensioners will remain the duration of the current valuation roll GV2013. The pensioners who are seventy years and above will continue to be granted the rebates for the duration of the current valuation roll that ends on 30 June 2018. Life right pensioners who leave in sectionalise unit registered in their names will be treated as stated above. Life rights pensioners who reside in life rights scheme registered in the name of the Trust or company will continue to receive the 50% rebate on the whole retirement village. Where a pensioner owns more than one property, the rebate is restricted to the property used as the place of primary residence.

(9) Exemptions, Reductions and Rebates

Section15 (2)(e) of the Act permits a Council to allow rebates to the owners of residential properties with a market value lower than an amount determined by the municipality. The Act provides that the first R15 000 of the value of all residential property be exempt from rating. The Council granted an additional threshold rebate of R185 000 giving the total threshold of R200 000 of market value for residential property.

(10) Property Owned in terms of Sectional Title

The policy of the Council is to encourage the improved utilisation of land. The development of Sectional Title is an appropriate avenue through which the Council's objectives are to archive densification. Sectional title rebate is proposed to be maintained at 5% in the next financial year.

(11) Vacant Land where Council is not able to provide infrastructure services

Certain pockets of land may be vacant owing to the Council not being in a position to provide infra structural services within the ensuing financial year. Under such circumstances, a rebate of 50% of the vacant land tariff will be proposed. The granting of this rebate is dependent upon successful application by the property owner concerned and the application has to be supported by the technical service departments concerned. Provision has been made in the

estimates for a rebate 50% for property situated outside the urban development zone since development is presently not permitted owing to lack of infrastructure services.

(12) Public service Infrastructure

In line with section 11(1)(b) of the Municipal Property Rates act, the City of Johannesburg will continue to exempt from rates the 30% of the value of the public service infrastructure.

Where C = 639.39 and T = 697.27

Where the COD is Chemical Oxygen Demand;

- and As = Total Arsenic;
- Cd = Total Cadmium;
- Co = Total Cobalt;
- Cr = Total Chromium;
- Cu = Total Copper;
- Hg = Total Mercury
- Mo = Total Molybdenum
- Ni = Total Nickel;
- Pb = Total Lead;
- Se = Total Selenium;
- Zn = Total Zinc.
- pH = - log [H³⁰⁺]

FOG = Total fat, oil and grease

As determined by the analytical methods used by the CYDNA Scientific Services Laboratory of Johannesburg Water (SOC) Ltd.

It is important that the sewer system is protected against acidic effluents and the charge for pH is therefore punitive. Similarly, metals are detrimental to the environment and the metal charge is also punitive. In addition, the discharge of excessive quantities of fat, oil and grease (FOG) into the sewer system causes blockages which is a public nuisance, a health risk and impedes the proper operation of the City's Waste Water Treatment Works. Hence the FOG charge is also punitive. Therefore, in cases where the Water Services By-laws are violated, pH will be assessed on the lowest and metals and FOG on peak values recorded during a six monthly period, irrespective of whether the industrial effluent volume discharged during that period is less than the value stipulated in clause 4.2 below.

- 4.2 In the case of any trade or industry in respect of which the average monthly volume of trade or industrial effluent generated during the previous half-year period was less than 100 kilolitres, the charge shall be: R22.59 per kilolitre except where punitive charges are applied.
- 4.3 In respect of domestic effluent discharged from the premises of any trade or industry for which a charge was levied in terms of clause C(1) above, the charge shall be: R 22.59 per kilolitre.

In the absence of direct measurement, the domestic effluent will be estimated as follows:

- (i) 1,0 kilolitre per full-time staff member per month.
- (ii) 4,0 kilolitre per resident per month {not included in (i) above}.
- (iii) For staff canteens: 0,15 kl per meal served per month.

(The working month will be based on a 5-day working week. In cases where the working week deviates from 5 days, a pro rata adjustment will be made).

- 4.4 Where the average monthly volume of trade or industrial effluent generated during the previous half-year period was more than 50 kilolitres, rebates under A above to be granted under conditions specified by the Council as follows—
- (a) 10% if discharge occurs at specified times only;
 - (b) 15% if flow is balanced and discharged evenly over seven days at specified times only;
 - (c) 20% if effluent contains readily bio-degradable carbon beneficial to the Council's treatment processes; and
 - (d) 50% maximum if (c) occurs with (a) and (b).

4.5 For the disposal of organic industrial wastes delivered by tanker to the wastewater treatment works: R13.28 per kilogram of COD.
