SECTION A: INTRODUCTION, DEFINITIONS AND PRINCIPLES

1. INTRODUCTION

The municipality need a reliable source of revenue to provide basic services and perform its functions. Property rates are the most important source of general revenue for the municipality. Revenue from property rates is used to fund services that benefit the community as a whole as opposed to individual households. These include installing and maintaining streets, roads, sidewalks, lighting and storm drainage facilities; and building and operating clinics, parks, recreational facilities and cemeteries. Property rates revenue is also used to fund municipal administration such as computer equipment and stationery, and costs of governance, such as council and community meetings, which facilitate community participation on issues of Integrated Development Plans (IDPs) and municipal budgets.

Municipal property rates are set, collected, and used locally. Revenue from property rates is spent within a municipality, where the citizens and voters have a voice in decisions on how the revenue is spent as part of the Integrated Development Plans (IDPs) and budget processes, which a municipality invites communities to input prior municipal council adoption of the budget.

7.5 All relevant information, including circumstantial evidence, may be taken into consideration in an attempt to determine for what purpose the property is being used. A physical inspection may be done to acquire the necessary information.

7.6 The geographical area in which a property is situated may be used to assist in the categorisation of a property when the provisions of 7.3. cannot be applied. However, the geographical area as a criterion should not be used in isolation.
