2.2 The municipality will differentiate between various categories of property and categories of owners of property as contemplated in clause 5 and 6 of this by-law.

2.3 Some categories of property and categories of owners will be granted relief from rates.

2.4 The municipality will not grant relief in respect of payments for rates to any category of owners or properties, or to owners of properties on an individual basis.

2.5 There will be no phasing in of rates based on the new valuation roll, except as prescribed by legislation and in accordance with clause 14 of this by-law.

2.6 The municipality's rates policy will be based on the following principles:
(a) Equity
The municipality will treat all ratepayers with similar properties the same.
(b) Affordability
The ability of a person to pay rates will be taken into account by the municipality. In dealing with the poor/indigent ratepayers the municipality will provide relief measures through exemptions, reductions or rebates.
(c) Sustainability
Rating of property will be implemented in a way that:
i. it supports sustainable local government by providing a stable and buoyant revenue source within the discretionary control of the municipality; and
ii. Supports local social economic development.
(d) Cost efficiency
Rates will be based on the value of all rateable property and will be used to fund community and subsidised services after taking into account surpluses generated on trading (water, electricity) and economic (refuse removal, sewerage removal) services and the amounts required to finance exemptions, rebates, reductions and phasing-in of rates as approved by the municipality from time to time.

3. Application of By-law

3.1 Where this by-law contradicts national legislation, such legislation has preference over this by-law. The Municipal Manager shall bring such conflicts immediately to the attention of the municipality once he becomes aware of such conflicts and will propose changes to the municipality's by-laws to eliminate such conflicts.

3.2 If there is any conflict between this by-law and the Property Rates policy of the municipality, this by-law will prevail.

3.3 In imposing the rate in the rand for each annual operating budget component, the municipality shall grant exemptions, rebates and reductions to the categories of properties and categories of owners.

4. Principles applicable to financing services

4.1 The municipal manager or his/her nominee must, subject to the guidelines provided by the National Treasury and Executive Committee of the municipality, make provision for the following classification of services:-

(c) Community and subsidised services
These include all those services ordinarily being rendered by the municipality excluding those mentioned in 4.1 (a) and (b).

4.2 Trading and economic services as referred to in clauses (a) and (b) must be ring fenced and financed from service charges while community and subsidised services referred to in clause (c) will be financed from surpluses on trading and economic services, regulatory fees, rates and rates related income.

5.4 In order to create certainty and to ensure consistency the criteria mentioned in 5.3 shall be applied as indicated below in order of priority and no deviation is permissible:

5.4.2 If, for whatever reason, the status or zoning of a property cannot be determined in terms of 5.4.1 the actual use shall then be determined in order to appropriately categorise such property. All relevant information, including circumstantial evidence, may be taken into consideration in an attempt to determine for what purpose the property is being used. A physical inspection may be done to acquire the necessary information.
5.4.3 The geographical area in which a property is situated may be used to assist in the categorisation of a property when the provisions of 5.4.1 can not be applied. However, the geographical area as a criterion should not be used in isolation.
