 - (f) floors that are solid and impervious;
 - (g) loading and offloading openings at the rear of the vehicle that are the full width of the vehicle or, if at the sides, a width not less than 2 400 millimetres; and

 - (b) at a loading bank equal to the height of the floor of the vehicle or, at off-loading, not more than 310 millimetres below the level of the off-loading vehicle and with an incline not exceeding 25 degrees.
- 29. Where a truck is equipped with an onboard removable loading ramp it must have a non-slip surface and be of a sufficient length when lowered, that the inclination is no steeper than the inclines referred to in item 28, with the distance from the ground to the heel of the ramp not exceeding 120 millimetres.
- 30. Ramps must be correctly adjusted to the exact height of the vehicle's floor.

- 35. When there is reason to believe that an animal is likely to give birth in the course of a proposed journey, the animal may not be loaded onto a vehicle.
- 36. In the case of an animal giving birth during transport, the necessary measures must be taken to ensure the protection of the mother and offspring from being trampled or otherwise injured or harassed by other animals.

- 40.** No wire or bailing twine may be used for tying the animal's legs or feet.
- 41.** To avoid strangulation or neck-break, a slipknot may not be used where animals are secured to the vehicle by horns or neck, and the rope must be attached to the vehicle at the level of the animal's knees so that in the event of the animal falling, the possibility of serious injury or death is reduced, with the rope being long enough to allow the animal to lie comfortably in a natural position with its head upright.

- (a) be located in a position agreed to between the owner and the Municipality and be of a size determined by the Municipality; and
 - (b) terminate at a connection point approximately one metre inside the premises from the boundary of the land owned by or vested in the Municipality or over which the Municipality has a servitude or other right or when subsection (3) applies, at the connecting point designated in terms of that subsection.
- (2) In reaching agreement with an owner concerning the location of a connecting sewer, the Municipality must determine—
- (a) practical restrictions that may exist regarding the location of a connecting sewer pipe;
 - (b) the cost implications of the various possible locations of the connecting sewer; and
 - (c) whether or not the Municipality requires the owner to fix the location of the connecting sewer by providing a portion of his or her water installation at or outside the boundary of his or her premises for the Municipality to connect to such installation.
- (3) (a) The Municipality may at the request of a person and subject to such conditions as it may impose, agree to a connection to a sewer other than that which is most readily available for the drainage of the premises.

(b) The person concerned is then responsible for—

(i) any extension of the drainage installation to the connecting point designated by an authorized officer; and

(ii) obtaining at his or her cost, such servitudes over other premises as may be necessary.

(4) An owner must pay the relevant charge set out in the prescribed tariff before a connection to the connecting sewer can be effected.

(5) Where an owner is required to provide a sewage lift as provided for in terms of the Building Regulations, the Municipality must approve the rate and time of discharge into the sewer.

72. Provision of one connecting sewer for several consumers on same premises

(1) Despite Section 70, but subject to subsection (2)(b), only one connecting sewer to the sewage disposal system may be provided for the disposal of sewage from any premises, irrespective of the number of accommodation units of consumers located on such premises.

(2) Where the owner, or the person having the charge or management of any premises on which several accommodation units are situated, requires the disposal of sewage from several accommodation units, the Municipality may provide and install either—

(a) a single connecting sewer in respect of the premises as a whole or any number of such accommodation units; or

(b) a separate connecting sewer for each accommodation unit or any number thereof.

(3) Where the Municipality has installed a single connecting sewer as contemplated in subsection (2)(a), the owner or the person having the charge or management of the premises, as the case may be—

(a) must, if the Municipality so requires, install and maintain on each branch pipe extending from the connecting sewer to the different accommodation units—

(i) a separate connecting sewer; and

(ii) an isolating valve; and

(b) is liable to the Municipality for the tariffs and charges for all sewage disposed from the premises through such a single connecting sewer, irrespective of the fact that by such connecting sewer, different quantities of sewage are disposed by the different consumers served.

(4) Despite subsection (1), the Municipality may authorise that more than one connecting sewer be provided on the sewage disposal system for the disposal of sewage from any premises comprising sectional title units or, if undue hardship or inconvenience would be caused to any consumer on such premises by the provision of only one connecting sewer.

(5) Where the provision of more than one connecting sewer is authorized by the Municipality, the tariffs and charges for the provision of a connecting sewer must be paid in respect of each sewage connection so provided.

73. Interconnection between premises

(1) An owner of one or more premises must, subject to subsection (2), ensure that no interconnection exists between the drainage installation on his or her premises and the drainage installation on other premises.

(2) Interconnection may exist only if he or she—

(a) has obtained the prior written consent of the Municipality; and

(b) complies with any conditions that it may have imposed.

74. Disconnection of draining installation from connecting sewer

The Municipality may disconnect a drainage installation from the connecting sewer and remove the connecting sewer if—

(a) the agreement for provision has been terminated and it has not received an application for subsequent provision to the premises served by the sewer within a period of 90 days of such termination; or

(b) the building on the premises concerned has been demolished.

Part 4: Standards and Conditions of Supply

75. Standard for sanitation services

Sanitation services provided by the Water Services Provider must comply with the minimum standards set for the provision of sanitation services in terms of Section 9 of the Act.

Part 5: Methods for determining discharges

76. Measurement of quantity of standard domestic effluent discharged

(1) The quantity of standard domestic effluent discharged will be regarded to be a percentage of water supplied by the Municipality, but where such a percentage in respect of specific premises is excessive, having regard to the purposes for which water is consumed on those premises, the Municipality may reduce the percentage applicable to those premises to a figure which, in the light of the available information, reflects the proportion between the likely quantity of sewage discharged from the premises and the quantity of water supplied thereto.

(2) Where premises are supplied with water from a source other than or in addition to the Municipality's water supply system, including abstraction from a river or borehole, the quantity will be regarded to be a percentage of the total water used on those premises as may be reasonably estimated by the Municipality.

77. Measurement of quantity and determination of quality of industrial effluent discharged

(1) The quantity of industrial effluent discharged into the sanitation system must be determined—

- (a) where a measuring device is installed, by the quantity of industrial effluent discharged from a premises as measured by that measuring device; or
 - (b) until such time as a measuring device is installed, by a percentage of the water supplied by the Municipality to those premises as may be reasonably estimated by the Municipality.
- (2) Subject to regulation 9 of Regulation 22355 promulgated in terms of the Act on 8 June 2001, the Municipality may require the owner of any premises to incorporate in any drainage installation which convey industrial effluent to a sewer, a control meter or gauge or other device of an approved type and in the control of the Municipality for the purpose of ascertaining the tempo, volume or composition of the effluent.
- (3) The Municipality may install and maintain any such meter, gauge or device at the expense of the owner of the premises on which it is installed.
- (4) Where premises are supplied with water from a source other than or in addition to the Municipality's water supply system, including abstraction from a river or borehole, the quantity of industrial effluent will be regarded to be a percentage of the total water used on that premises as may be reasonably estimated by the Municipality.
- (5) The Municipality may on application reduce the assessed quantity of industrial effluent where a portion of the water supplied to the premises—
- (a) forms part of the end product of any manufacturing process; or
 - (b) is lost by reaction or evaporation during the manufacturing process or for any other reason,
- (6) The Municipality may enter into a services agreement with any person who discharges industrial effluent into the sanitation system, to establish an alternative method of assessing the quantity and rate of effluent so discharged.
- (7) Charges relating to the quality of industrial effluent are based on the formula for industrial effluent discharged as set out in Schedule 4.
- (8) The following conditions apply in respect of the assessment of the quality of industrial effluent discharged:
- (a) Each consumer must conduct the prescribed tests, on a regular schedule as provided for in the approval to discharge industrial effluent under Section 100, and report the results to the Municipality;
 - (b) the Municipality may conduct random compliance tests to correlate those of the industry, and—
 - (i) if discrepancies are found, the values of the Municipality are to be taken as correct; and
 - (ii) further tests may be requested by the Municipality to determine the values for the formula, at the cost of the consumer;
 - (c) the average of the values of the different analyses results of 24 hourly composite or snap samples of the effluent, taken during the period of charge, must be used to determine the quality charges payable;
 - (d) in the absence of a complete daily set of 24 hourly composite or snap samples, the average of not less than two values of the sampled effluent, taken during the period of charge, must be used to determine the charges payable;
 - (e) in order to determine—
 - (i) the strength (chemical oxygen demand, suspended solids concentration, Ammonia concentration, ortho-phosphate concentration) in the effluent;
 - (ii) the concentration of Groups 1 and 2 metals;
 - (iii) the pH value; and
 - (iv) conductivity,
 the Municipality must use the tests normally used by municipalities for these respective purposes, Details of the appropriate test may be ascertained from the Municipality or the SABS and test results from an accredited laboratory will have precedence over those of the Municipality;
 - (f) the strength must be calculated on the basis of the different analyses results of individual snap or composite samples, and the period applicable to the calculation may not be less than one full 24-hour period, unless strong evidence is submitted to the Municipality that a lesser period is actually applicable;
 - (g) the terms of the industrial effluent formula may not assume a negative value;
 - (h) the total system values for quality charges must remain constant, initially for a period of one month, but in any case not longer than 12 months from the date of commencement of these charges, after expiry of which they may be amended or revised from time to time depending on such changes in the analyses results or further samples as may be determined from time to time, but the Municipality, in any particular case, may levy the minimum charges contemplated in subsection (7) without taking any samples;
 - (i) whenever the Municipality takes a sample, one half thereof must be made available to the consumer;
 - (j) for the purpose of calculating the quantity of effluent discharged from each point of discharge of effluent, the total quantity of water consumed on the premises must be allocated among the several points of discharge as accurately as is reasonably practicable;
 - (k) the costs of conveying and treating industrial effluent must be determined and apply with effect from such date as may be determined; and
 - (l) the Municipality may change the charges for industrial effluent to a fixed monthly charge, and the minimum charge is to be determined taking into consideration the effluent strengths, the volume and the economic viability of micro and small industries.

78. Reduction in measured quantity of effluent discharged

- (1) A person is entitled to a reduction in the quantity of effluent discharged into the sanitation system as determined in terms of Sections 76 and 77 if he or she can demonstrate that the quantity of water on which the percentage is calculated was measured during a period when water was wasted or a leakage went undetected.
- (2) The reduction in the quantity is based on the quantity of water loss through leakage or wastage during the leak period.
- (3) The leak period is, whichever results in the greater reduction in the quantity, either—
- (a) the measuring period immediately before the date of repair of the leak; or
 - (b) the measurement period during which the leak is repaired,

(4) The quantity of water loss must be calculated as the consumption for the leak period less an average consumption, based on the preceding three months, for the same length of time, and if no previous consumption history is available, the average water consumption must be determined by the Municipality after due consideration of all information.

(5) There may be no reduction in the quantity if the loss of water, directly or indirectly, resulted from the consumer's failure to comply with, or is in contravention of these or other by-laws of the Municipality.

 - (e) if that person's address and agent or representative in the Republic is unknown, when it has been posted in a conspicuous place on the property or premises, if any, to which it relates.
- (2) When any notice or other document must be authorized or served on the owner, occupier or holder of any property or right in any property, it is sufficient if that person is described in the notice or other document as the owner, occupier or holder of the property or right in question, and it is not necessary to name that person.
- (3) Any legal process is effectively and sufficiently served on the Municipality when it is delivered to the municipal manager or a person in attendance at the municipal manager's office.

5. Compliance with notices

Any person on whom a notice duly issued or given under this by-law is served shall, within the time specified in such notice, comply with its terms.

6. Application for supply

- (1) Application for the supply of electricity shall be made in writing by the prospective consumer on the prescribed form obtainable at the office of the Municipality, and the estimated load, in kVA, of the installation, shall be stated therein. Such application shall be made as early as possible before the supply of electricity is required in order to facilitate the work of the Municipality.
- (2) An application for an electricity supply for a period of less than one year shall be regarded as an application for a temporary supply of electricity and shall be considered at the discretion of the Municipality or any duly authorized official of the Municipality, which may specify any special conditions to be satisfied in such case.

7. Processing of requests for supply

Applications for the supply of electricity will be processed and the supply made available within the periods stipulated in NRS 047.

8. Wayleaves

- (1) The Municipality may refuse to lay or erect a service connection above or below ground on any thoroughfare or land not vested in the Municipality or on any private property, unless and until the prospective consumer shall have obtained and deposited with the Municipality written permission granted by the owner of the said private property or by the person in whom is vested the legal title to the land or thoroughfare as aforesaid exists, as the case may be, authorizing the laying or erection of a service connection thereon.
- (2) If such permission is withdrawn at any time or if the aforesaid private property or thoroughfare changes ownership and the new owner refuses to grant or continue such permission, the cost of any alteration required to be made to a service connection in order that the supply of electricity may be continued, and of any removal thereof which may become necessary in the circumstances, shall be borne by the consumer to whose premises the supply of electricity is required to be continued.

- (2) If the Municipality constructs, erects or lays any electricity supply main on, across, through, over or under any street or immovable property not owned by the Municipality or under the control of or management of the Municipality it shall pay to the owner of such street or property compensation in an amount agreed upon by such owner and the Municipality or, in the absence of agreement, as determined either by arbitration or a court of law.
- (3) The Municipality shall, before commencing any work other than repairs or maintenance on or in connection with any electricity supply main on immovable property not owned by the Municipality or under the control or management of the Municipality, give the owner or occupier of such property reasonable notice of the proposed work and the date on which it proposes to commence such work.

10. Right of admittance to inspect, test or do maintenance work

- (1) The Municipality shall, through its employees, contractors and their assistants and advisers, have access to or over any property for the purposes of-
 - (a) doing anything authorized or required to be done by the Municipality under this by-law or any other law;
 - (b) inspecting and examining any service mains and anything connected therewith;
 - (c) enquiring into and investigating any possible source of electricity supply or the suitability of immovable property for any work, scheme or undertaking of the Municipality and making any necessary survey in connection therewith;

- (3) An employee of the Municipality authorized thereto by such Municipality may, by notice in writing served on the owner or occupier of any property, require such owner or occupier to provide, on the day and at the hour specified in such notice, access to such property to a person and for a purpose referred to in subsection (1).
- (4) The Municipality may gain access to or over any property without notice and may take whatever action as may, in its opinion, be necessary or desirable in consequence of the existence of a state of war or the occurrence of any calamity, emergency or disaster.

11. Refusal or failure to give information

No person shall refuse or fail to give such information as may be reasonably required of him or her by any duly authorized official of the Municipality or render any false information to any such official regarding any electrical installation work completed or contemplated.

12. Refusal of admittance

No person shall willfully hinder, obstruct, interfere with or refuse admittance to any duly authorized official of the Municipality in the performance of his duty under this by-law or of any duty connected therewith or relating thereto.

13. Improper use

If the consumer uses the electricity for any purpose or deals with the electricity in any manner which the Municipality has reasonable grounds for believing interferes in an improper or unsafe manner or is calculated to interfere in an improper or unsafe manner with the efficient supply of electricity to any other consumer, the Municipality may, with or without notice, disconnect the electricity supply but such supply shall be restored as soon as the cause for the disconnection has been permanently remedied or removed. The fee as prescribed by the Municipality for the disconnection and reconnection shall be paid by the consumer before the electricity supply is restored, unless it can be shown that the consumer did not use or deal with the electricity in an improper or unsafe manner.

14. Electricity tariffs and fees

Copies of charges and fees may be obtained free of charge at the offices of the Municipality.

15. Deposits

The Municipality reserves the right to require the consumer to deposit a sum of money as security in payment of any charges which are due or may become due to the Municipality. The amount of the deposit in respect of each electricity installation shall be determined by the Municipality, and each such deposit may be increased if the Municipality deems the deposit held to be inadequate. Such deposit shall not be regarded as being in payment or part payment of any accounts due for the supply of electricity for the purpose of obtaining any discount provided for in the electricity tariff referred to in this by-law. On cessation of the supply of electricity, the amount of such deposit, free of any interest, less any payments due to the Municipality shall be refunded to the consumer.

16. Payment of charges

- (1) The consumer shall be liable for all charges listed in the prescribed tariff for the electricity service as approved by the Municipality. A copy of the prescribed tariff is obtainable free of charge from the Municipality.
- (2) All accounts shall be deemed to be payable when issued by the Municipality and each account shall, on its face, reflect the due date and a warning indicating that the supply of electricity may be disconnected should the charges in respect of such supply remain unpaid after the due date.
- (3) An error or omission in any account or failure to render an account shall not relieve the consumer of his obligation to pay the correct amount due for electricity supplied to the premises and the onus shall be on the consumer to satisfy himself/herself that the account rendered is in accordance with the prescribed tariff of charges in respect of electricity supplied to the premises.
- (4) Where a duly authorized official of the Municipality has visited the premises for the purpose of disconnecting the supply of electricity in terms of subsection (2) and he or she is obstructed or prevented from effecting such disconnection, the prescribed fee shall become payable for each visit necessary for the purpose of such disconnection.
- (5) After disconnection for non-payment of an account, the prescribed fees and any amounts due for electricity consumed shall be paid before the electricity supply is re-connected.

17. Interest on overdue accounts

The Municipality may charge interest on accounts which are not paid by the due date appearing on the account, at an interest rate as approved by the Municipality from time to time.

18. Principles for the resale of electricity

- (1) Unless otherwise authorized by the Municipality, no person shall sell or supply electricity, supplied to his or her premises under an agreement with the Municipality, to any other person or persons for use on any other premises, or permit or suffer such resale or supply to take place. If

electricity is resold for use upon the same premises, the electricity resold shall be measured by a sub meter of a type which has been approved by Standards South Africa and supplied, installed and programmed in accordance with the standards of the Municipality.

- (2) The tariff, rates and charges at which and the conditions of sale under which electricity is thus resold shall not be less favorable to the purchaser than those that would have been payable and applicable had the purchaser been supplied directly with electricity by the Municipality. Every reseller shall furnish the purchaser with monthly accounts that are at least as detailed as the relevant billing information details provided by the Municipality to its electricity consumers.

19. Right to disconnect supply

- (1) The Municipality shall have the right to disconnect the supply of electricity to any premises if the person liable to pay for such supply fails to pay any charge due to the Municipality in connection with any supply of electricity which he or she may at any time have received from the Municipality in respect of such premises, or, where any of the provisions of this by-law or the Regulations are being contravened, provided the Municipality has given the person 14 (fourteen) days notice to remedy his/her default and the person has failed to remedy such default after notice has been given, or, in the case of a grave risk to person or property, or as envisaged in terms of Section 26 of this by-law, without notice. After disconnection for non-payment of accounts or the improper or unsafe use of electricity, the fee as prescribed by the Municipality shall be paid.
- (2) In the case where an installation has been illegally reconnected on a consumer's premises after having been previously legally disconnected by the Municipality, or in the case where the Municipality's electrical equipment has been tampered with to prevent the full registration of consumption by the meter, the electricity supply may be physically removed from those premises.

20. Non-liability of the Municipality

The Municipality shall not be liable for any loss or damage, direct or consequential, suffered or sustained by a consumer as a result of or arising from the cessation, interruption or any other abnormality of the supply of electricity, unless caused by negligence on the part of the Municipality.

21. Leakage of electricity

Under no circumstances shall any rebate be allowed on the account for electricity supplied and metered in respect of electricity wasted owing to leakage or any other fault in the electrical installation.

22. Failure of supply

The Municipality does not undertake to attend to a failure of supply of electricity due to a fault in the electrical installation of the consumer, except when such failure is due to the operation of the service protective device of the Municipality. When any failure of supply of electricity is found to be due to a fault in the electrical installation of the consumer or to the faulty operation of apparatus used in connection therewith, the Municipality shall have the right to charge the consumer the fee as prescribed by the Municipality for each restoration of the supply of electricity in addition to the cost of making good or repairing any damage which may have been done to the service main and meter by such fault or faulty operation as aforesaid.

23. Seals of the Municipality

The meter, service protective devices and all apparatus belonging to the Municipality shall be sealed or locked by a duly authorized official of the Municipality, and no person not being an official of the Municipality duly authorized thereto shall in any manner or for any reason whatsoever remove, break, deface, or tamper or interfere with such seals or locks.

- (2) Where prima facie evidence exists of a consumer or any person having contravened subsection(1), the Municipality shall have the right to disconnect the supply of electricity immediately and without prior notice to the consumer. The person shall be liable for all fees and charges levied by the Municipality for such disconnection.
- (3) Where a consumer or any person has contravened subsection(1) and such contravention has resulted in the meter recording less than the true consumption, the Municipality shall have the right to recover from the consumer the full cost of his estimated consumption.

25. Protection of Municipality's supply mains

- (1) No person shall, except with the consent of the Municipality and subject to such conditions as may be imposed —
 - (a) construct, erect or lay, or permit the construction, erection or laying of any building, structure or other object, or plant trees or vegetation over or in such a position or in such a manner as to interfere with or endanger the supply mains.
 - (b) excavate, open up or remove the ground above, next to, under or near any part of the supply mains.
 - (c) damage, endanger, remove or destroy, or do any act likely to damage, endanger or destroy any part of the supply mains.
 - (d) make any unauthorized connection to any part of the supply mains or divert or cause to be diverted any electricity there from.
 - (e) The owner or occupier shall limit the height of trees or length of projecting branches in the proximity of overhead lines or provide a means of protection which in the opinion of the Municipality will adequately prevent the tree from interfering with the conductors should the tree or branch fall or be cut down. Should the owner fail to observe this provision the Municipality shall have the right, after prior written notification, or at any time in an emergency, to cut or trim the trees or other vegetation in such a manner as to comply with this provision and shall be entitled to enter the property for this purpose.
- (2) The Municipality may subject to obtaining an order of court demolish, alter or other wise deal with any building, structure or other object constructed, erected or laid in contravention with this by-law.
- (3) The municipality may in the case of an emergency or disaster remove anything damaging, obstructing or endangering or likely to damage, obstruct, endanger or destroy any part of the electrical distribution system.

26. Prevention of tampering with service connection or supply mains

If the Municipality decides that it is necessary or desirable to take special precautions in order to prevent tampering with any portion of the supply mains, service connection or service protective device or meter or metering equipment, the consumer shall either supply and install the necessary protection or pay the costs involved where such protection is supplied by the Municipality.

27. Unauthorized connections

No person other than a person specifically authorized thereto by the Municipality in writing shall directly or indirectly connect, attempt to connect or cause or permit to be connected any electrical installation or part thereof to the supply mains or service connection.

28. Unauthorized reconnections

- (1) No person other than a person specifically authorized thereto by the Municipality in writing shall reconnect, attempt to reconnect or cause or permit to be reconnected to the supply mains or service connection any electrical installation or installations which has or have been disconnected by the Municipality.
- (2) Where the supply of electricity that has previously been disconnected is found to have been reconnected, the consumer using the supply of electricity shall be liable for all charges for electricity consumed between the date of disconnection and the date the electricity supply was found to be reconnected and any other charges raised in this regard. Furthermore, the Municipality reserves the right to remove part or all of the supply equipment until such time as payment has been received in full. In addition, the consumer will be responsible for all the costs associated with the reinstatement of such supply equipment.

29. Temporary disconnection and reconnection

- (1) The Municipality shall, at the request of the consumer, temporarily disconnect and reconnect the supply of electricity to the consumer's electrical installation upon payment of the fee as prescribed by the Municipality for each such disconnection and subsequent reconnection.
- (2) In the event of the necessity arising for the Municipality to effect a temporary disconnection and reconnection of the supply of electricity to a consumer's electrical installation and the consumer is in no way responsible for bringing about this necessity, the Municipality shall waive payment of the fee hereinbefore referred to.
- (3) The Municipality may only under exceptional circumstances temporarily disconnect the supply of electricity to any premises without notice, for the purpose of effecting repairs or carrying out tests or for any other legitimate purpose. In all other instances adequate notice shall be given.

30. Temporary supplies

It shall be a condition of the giving of any temporary supply of electricity, as defined in this by-law, that, if such supply is found to interfere with the efficient and economical supply of electricity to other consumers, the Municipality shall have the right, with notice, or under exceptional circumstances without notice, to terminate such temporary supply at any time and, the Municipality shall not be liable for any loss or damage occasioned by the consumer by such termination.

31. Temporary work

Electrical installations requiring a temporary supply of electricity shall not be connected directly or indirectly to the supply mains except with the special permission in writing of the Municipality. Full information as to the reasons for and nature of such temporary work shall accompany the application for the aforesaid permission, and the Municipality may refuse such permission or may grant the same upon such terms and conditions as it may appear desirable and necessary.

32. Load reduction

- (1) At times of peak load, or in an emergency, or when, in the opinion of the Municipality, it is necessary for any reason to reduce the load on the electricity supply system of the Municipality, the Municipality may without notice interrupt and, for such period as the Municipality may deem necessary, discontinue the electricity supply to any consumer's electrically operated thermal storage water heater or any specific appliance or the whole installation. The Municipality shall not be liable for any loss or damage directly or consequentially due to or arising from such interruption and discontinuance of the electricity supply.
- (2) The Municipality may install upon the premises of the consumer such apparatus and equipment as may be necessary to give effect to the provisions of subsection (1), and any duly authorized official of the Municipality may at any reasonable time enter any premises for the purpose of installing, inspecting, testing adjusting or changing such apparatus and equipment.
- (3) Notwithstanding the provisions of subsection (2), the consumer or the owner, as the case may be, shall, when installing an electrically operated water storage heater, provide such necessary accommodation and wiring as the Municipality may decide to facilitate the later installation of the apparatus and equipment referred to in subsection (2).

33. High, medium and low voltage switchgear and equipment

- (1) In cases where a supply of electricity is given at either high, medium or low voltage, the supply and installation of the switchgear, cables and equipment forming part of the service connection shall, unless otherwise approved by the Municipality or any duly authorized official of the Municipality, be paid for by the consumer.
- (2) All such equipment installed on the consumer's premises shall be compatible with the Municipality's electrical performance standards.
- (3) No person shall open, close, isolate, link or earth high or medium voltage switchgear or equipment without giving reasonable prior notice to the Municipality's System Control Centre.

- (5) In the case of a low voltage supply of electricity, the consumer shall provide and install a low voltage main switch or any other equipment required by the Municipality or any duly authorized official of the Municipality.

34. Substation accommodation

The Municipality may, on such conditions as may be deemed fit by the Municipality or any duly authorized official of the Municipality, require the owner to provide and maintain accommodation which shall constitute a substation and which shall consist of a separate room or rooms to be used exclusively for the purpose of housing medium voltage cables and switchgear, transformers, low voltage cables and switchgear and other equipment necessary for the supply of electricity requested by the applicant. The accommodation shall be situated at a point to which free, adequate and unrestricted access is available at all times for purposes connected with the operation and maintenance of the equipment.

The Municipality reserves the right to supply its own networks from its own equipment installed in such accommodation, and if additional accommodation is required by the Municipality, such additional accommodation shall be provided by the applicant at the cost of the Municipality.

35. Wiring diagram and specification

- (1) When more than one electrical installation or electricity supply from a common main or more than one distribution board or meter is required for any building or block of buildings, the wiring diagram of the circuits starting from the main switch and a specification shall on request be supplied to the Municipality in duplicate for approval before the work commences.
- (2) Where an electrical installation is to be supplied from a substation on the same premises on which the current is transformed from high voltage, or from one of the substations of the Municipality through mains separate from the general distribution system, a complete specification and drawings for the plant to be installed by the consumer shall, if so required, be forwarded to the Municipality for approval before any material in connection therewith is ordered.

36. Standby supply

No person shall be entitled to a standby supply of electricity from the Municipality for any premises having a separate source of electricity supply except with the written consent of the Municipality and subject to such terms and conditions as may be laid down by the Municipality.

37. Consumer's emergency standby supply equipment

- (1) No emergency standby equipment provided by a consumer in terms of any Regulations or for his own operational requirements shall be connected to any installation without the prior written approval of the Municipality. Application for such approval shall be made in writing and shall include a full specification of the equipment and a wiring diagram. The standby equipment shall be so designed and installed that it is impossible for the Municipality's supply mains to be energized by means of a back-feed from such equipment. The consumer shall be responsible for providing and installing all such protective equipment.
- (2) Where by special agreement with the Municipality, the consumer's standby generating equipment is permitted to be electrically coupled to, and run in parallel with the Municipality's supply mains, the consumer shall be responsible for providing, installing and maintaining all the necessary synchronizing and protective equipment required for such safe parallel operation, to the satisfaction of the Municipality.

38. Circular letters

The Municipality may from time to time issue Circulars detailing the requirements of the Municipality regarding matters not specifically covered in the Regulations or this by-law but which are necessary for the safe, efficient operation and management of the supply of electricity.

CHAPTER 2**RESPONSIBILITIES OF CONSUMERS****39. Consumer to erect and maintain electrical installation**

Any electrical installation connected or to be connected to the supply mains, and any additions or alterations thereto which may be made from time to time, shall be provided and erected and maintained and kept in good order by the consumer at his own expense and in accordance with this by-law and the Regulations.

40. Fault in electrical installation

- (1) If any fault develops in the electrical installation, which constitutes a hazard to persons, livestock or property, the consumer shall immediately disconnect the electricity supply. The consumer shall without delay give notice thereof to the Municipality and shall immediately take steps to remedy the fault.
- (2) The Municipality may require the consumer to reimburse it for any expense to which it may be put in connection with a fault in the electrical installation.

41. Discontinuance of use of supply

In the event of a consumer desiring to discontinue using the electricity supply, he or she shall give at least two full working days' notice in writing of such intended discontinuance to the Municipality, failing which he or she shall remain liable for all payments due in terms of the tariff for the supply of electricity until the expiration of two full working days after such notice has been given.

42. Change of occupier

- (1) A consumer vacating any premises shall give the Municipality not less than two full working days' notice in writing of his intention to discontinue using the electricity supply, failing which he or she shall remain liable for such supply.
- (2) If the person taking over occupation of the premises desires to continue using the electricity supply, he or she shall make application in accordance with the provisions of section 5 of this by-law, and if he or she fails to make application for an electricity supply within ten working days of taking occupation of the premises, the supply of electricity shall be disconnected, and he or she shall be liable to the Municipality for the electricity supply from the date of occupation till such time as the supply is so disconnected.
- (3) Where premises are fitted with pre-payment meters any person occupying the premises at that time shall be deemed to be the consumer. Until such time as an application is made by this person for a supply of electricity, in terms of section 5 of this by-law, he or she shall be liable for all charges and fees owed to the Municipality for that metering point as well as any outstanding charges and fees whether accrued by that person or not.

43. Service apparatus

- (1) The consumer shall be liable for all costs to the Municipality arising from damage to or loss of any metering equipment, service protective device, service connection or other apparatus on the premises, unless such damage or loss is shown to have been occasioned by an Act of God or an act or omission of an employee of the Municipality or caused by an abnormality in the supply of electricity to the premises.
- (2) If, during a period of disconnection of an installation from the supply mains, the service main, metering equipment or any other service apparatus, being the property of the Municipality and having been previously used, have been removed without its permission or have been damaged so as to render reconnection dangerous, the owner or occupier of the premises, as the case may be, during such period shall bear the cost of overhauling or replacing such equipment.
- (3) Where there is a common metering position, the liability detailed in subsection (1) shall devolve on the owner of the premises.
- (4) The amount due in terms of subsection (1) shall be evidenced by a certificate from the Municipality which shall be final and binding.

CHAPTER 3

SPECIFIC CONDITIONS OF SUPPLY

- (1) The consumer shall bear the cost of the service connection, as approved by the Municipality.
- (2) Notwithstanding the fact that the consumer bears the cost of the service connection, ownership of the service connection, laid or erected by the Municipality, shall vest in the Municipality, the Municipality shall be responsible for the maintenance of such service connection up to the point of supply. The consumer shall not be entitled to any compensation from the Municipality in respect of such service connection.
- (3) The work to be carried out by the Municipality at the cost of the consumer for a service connection to the consumer's premises shall be determined by the Municipality or any duly authorized official of the Municipality.
- (4) A service connection shall be laid underground, whether the supply mains are laid underground or erected overhead, unless an overhead service connection is specifically required by the Municipality.
- (5) The consumer shall provide, fix or maintain on his premises such ducts, wire ways, trenches, fastenings and clearance to overhead supply mains as may be required by the Municipality for the installation of the service connection.
- (6) The conductor used for the service connection shall have a cross-sectional area according to the size of the electrical supply but shall not be less than 10 mm² (copper or copper equivalent), and all conductors shall have the same cross-sectional area, unless otherwise approved by any duly authorized official of the Municipality.
- (7) Unless otherwise approved, the Municipality shall only provide one service connection to each registered erf. In respect of two or more premises belonging to one owner and situated on adjacent erven, a single bulk supply of electricity may be made available provided the erven are consolidated or notorially tied.
- (8) Any covers of a wire way carrying the supply circuit from the point of supply to the metering equipment shall be made to accept the seals of the Municipality.
- (9) Within the meter box, the service conductor or cable, as the case may be, shall terminate in an unobscured position and the conductors shall be visible throughout their length when cover plates, if present, are removed.
- (10) In the case of blocks of buildings occupied by a number of individual consumers, separate wire ways and conductors or cables shall be laid from the common metering room or rooms to each individual consumer in the blocks of buildings. Alternatively, if trunking is used, the conductors of the individual circuits shall be clearly identified (tied together every 1,5m) throughout their length.

45. Metering accommodation

- (1) The consumer shall, if required by the Municipality or any duly authorized official of the Municipality, provide accommodation in an approved position, the meter board and adequate conductors for the Municipality's metering equipment, service apparatus and protective devices. Such accommodation and protection shall be provided and maintained, to the satisfaction of the Municipality, at the cost of the consumer or the owner, as the circumstances may demand, and shall be situated, in the case of credit meters, at a point to which free and unrestricted access shall be had at all reasonable hours for the reading of meters but at all times for purposes connected with the operation and maintenance of the service equipment. Access at all reasonable hours shall be afforded for the inspection of prepayment meters.
- (2) Where sub metering equipment is installed, accommodation separate from the Municipality's metering equipment shall be provided.
- (3) The consumer or, in the case of a common meter position, the owner of the premises shall provide adequate electric lighting in the space set aside for accommodating the metering equipment and service apparatus.

- (5) The accommodation for the Municipality's metering equipment and protective devices may, if approved, include the consumer's main switch and main protective devices. No apparatus other than that used in connection with the supply of electricity and use of electricity shall be installed or stored in such accommodation unless approved.

CHAPTER 4

Alternating current supplies shall be given as prescribed by the Electricity Act, 1987 (Act 41 of 1987), and in the absence of a quality of supply agreement, as set out in applicable standard specification.

47. Load limitations

- (1) Where the estimated load, calculated in terms of the safety standard, does not exceed 15 kVA, the electrical installation shall be arranged for a two-wire single-phase supply of electricity, unless otherwise approved by the Municipality or any duly authorized official of the Municipality.
- (2) Where a three-phase four-wire supply of electricity is provided, the load shall be approximately balanced over the three phases but the maximum out-of-balance load shall not exceed 15kVA, unless otherwise approved by the Municipality or any duly authorized official of the Municipality.
- (3) No current-consuming appliance, inherently single phase in character, with a rating which exceeds 15kVA shall be connected to the electrical installation without the prior approval of the Municipality.

48. Interference with other persons' electrical equipment

- (1) No person shall operate electrical equipment having load characteristics which, singly or collectively, give rise to voltage variations, harmonic currents or voltages, or unbalanced phase currents which fall outside the applicable standard specification.
- (2) The assessment of interference with other persons' electrical equipment shall be carried out by means of measurements taken at the point of common coupling.

- (3) Should it be established that undue interference is in fact occurring, the consumer shall, at his/her own cost, install the necessary equipment to filter out the interference and prevent it reaching the supply mains.

49. Supplies to motors

Unless otherwise approved by the Municipality or any duly authorized official of the Municipality the rating of motors shall be limited as follows:

- (1) Limited size for low voltage motors —
The rating of a low voltage single-phase motor shall be limited to 2kW or the starting current shall not exceed 70A. All motors exceeding these limits shall be wound for three phases at low voltage or such higher voltage as may be required.
- (2) Maximum starting and accelerating currents of three-phase alternating current motors —
The starting current of three-phase low voltage motors permitted shall be related to the capacity of the consumer's service connection, as follows:

Insulated service cable, size in mm ² , copper equivalent mm ²	Maximum permissible starting current A	Maximum motor rating in kW		
		Direct on line (6x full-load current kW	Star/Delta (2,5 x full-load current) kW	Other means (1,5 x full-load current) kW

In an installation supplied at medium voltage the starting current of a low voltage motor shall be limited to 1,5 times the rated full-load current of the transformer supplying such a motor. The starting arrangement for medium voltage motors shall be subject to the approval of the Municipality.

50. Power factor

- (1) If required by the Municipality, the power factor of any load shall be maintained within the limits 0,85 lagging and 0,9 leading.
- (2) Where, for the purpose of complying with subsection (1), it is necessary to install power factor corrective devices, such corrective devices shall be connected to the individual appliance terminals unless the correction of the power factor is automatically controlled.
- (3) The consumer shall, at his/her own cost, install such corrective devices.

51. Protection

Electrical protective devices for motors shall be of such a design as effectively to prevent sustained overcurrent and single phasing, where applicable.

CHAPTER 5

MEASUREMENT OF ELECTRICITY

52. Metering

- (1) The Municipality shall, at the consumer's cost in the form of a direct charge or prescribed fee, provide, install and maintain appropriately rated metering equipment at the point of metering for measuring the electricity supplied.
- (2) Except in the case of prepayment meters, the electricity used by a consumer during any metering period shall be ascertained by the reading of the appropriate meter or meters supplied and installed by the Municipality and read at the end of such period except where the metering equipment is found to be defective, or the Municipality invokes the provisions of section 54(2) of this by-law, in which case the consumption for the period shall be estimated.
- (3) Where the electricity used by a consumer is charged at different tariff rates, the consumption shall be metered separately for each rate.
- (4) The Municipality reserves the right to meter the supply to blocks of shops and flats, tenement-houses and similar buildings for the buildings as a whole, or for individual units, or for groups of units.
- (5) No alterations, repairs or additions or electrical connections of any description shall be made on the supply side of the point of metering unless specifically approved in writing by the Municipality or any duly authorized official of the Municipality.

53. Accuracy of metering

- (1) A meter shall be conclusively presumed to be registering accurately if its error, when tested in the manner prescribed in subsection (5) hereof, is found to be within the limits of error as provided for in the applicable standard specifications.
- (2) The Municipality shall have the right to test its metering equipment. If it is established by test or otherwise that such metering equipment is defective, the Municipality shall—
- in the case of a credit meter, adjust the account rendered;
 - in the case of prepayment meters, (a) render an account where the meter has been under-registering, or (b) issue a free token where the meter has been over-registering;
in accordance with the provisions of subsection (6).

- (3) The consumer shall be entitled to have the metering equipment tested by the Municipality on payment of the prescribed fee. If the metering equipment is found not to comply with the system accuracy requirements as provided for in the applicable standard specifications, an adjustment in accordance with the provisions of subsections (2) and (6) shall be made and the aforesaid fee shall be refunded.
- (4) In case of a dispute, the consumer shall have the right at his own cost to have the metering equipment under dispute tested by an approved independent testing authority, and the result of such test shall be final and binding on both parties.
- (5) Meters shall be tested in the manner as provided for in the applicable standard specifications.
- (6) When an adjustment is made to the electricity consumption registered on a meter in terms of subsection (2) or (3), such adjustment shall either be based on the percentage error of the meter as determined by the test referred to in subsection (5) or upon a calculation by the Municipality from consumption data in its possession. Where applicable, due allowance shall be made, where possible, for seasonal or other variations which may affect the consumption of electricity.
- (7) When an adjustment is made as contemplated in subsection (6), the adjustment may not exceed a period of six months preceding the date on which the metering equipment was found to be inaccurate. The application of this section does not bar a consumer from claiming back overpayment for any longer period where the consumer is able to prove the claim in the normal legal process.
- (8) Where the actual load of a consumer differs from the initial estimated load provided for under section 8(1) to the extent that the Municipality deems it necessary to alter or replace its metering equipment to match the load, the costs of such alteration or replacement shall be borne by the consumer.
- (9) (a) Prior to the Municipality making any upward adjustment to an account in terms of subsection (6), the Municipality shall—
 - (i) notify the consumer in writing of the monetary value of the adjustment to be made and the reasons therefore;
 - (ii) in such notification provide sufficient particulars to enable the consumer to submit representations thereon, and
 - (iii) call upon the consumer in such notice to provide it with reasons in writing, if any, within 21 days or such longer period as the Municipality may permit why his/her account should not be adjusted as notified.
- (b) Should the consumer fail to make any representations during the period referred to in subsection 9(a)(iii) the Municipality shall be entitled to adjust the account as notified in subsection 9(a)(i).
- (c) The Municipality shall consider any reasons provided by the consumer in terms of subsection (9)(a) and shall, if satisfied that a case has been made out therefore, adjust the account appropriately.
- (d) If a duly authorized official of the Municipality decides after having considered the representation made by the consumer that such representations do not establish a case warranting an amendment to the monetary value established in terms of subsection (6), the Municipality shall be entitled to adjust the account as notified in terms of subsection 9(a)(i), subject to the consumer's right to appeal the decision of the official in terms of section 61 of this by-law.

54. Reading of credit meters

- (1) Unless otherwise prescribed, credit meters shall normally be read at intervals of one month and the fixed or minimum charges due in terms of the tariff shall be assessed accordingly. The Municipality shall not be obliged to effect any adjustments to such charges.
- (2) If for any reason the credit meter cannot be read, the Municipality may render an estimated account. The electrical energy consumed shall be adjusted in a subsequent account in accordance with the electrical energy actually consumed.
- (3) When a consumer vacates a property and a final reading of the meter is not possible, an estimation of the consumption may be made and the final account rendered accordingly.
- (4) If a special reading of the meter is desired by a consumer, this may be obtained upon payment of the prescribed fee.
- (5) If any calculating, reading or metering error is discovered in respect of any account rendered to a consumer, the error shall be corrected in subsequent accounts. Any such correction shall only apply in respect of accounts for a period of 6 months preceding the date on which the error in the accounts was discovered, and shall be based on the actual tariffs applicable during the period. The application of this section does not prevent a consumer from claiming back overpayment for any longer period where the consumer is able to prove the claim in the normal legal process.

55. Prepayment metering

- (1) No refund of the amount tendered for the purchase of electricity credit shall be given at the point of sale after initiation of the process by which the prepayment meter token is produced.
- (2) Copies of previously issued tokens for the transfer of credit to the prepayment meter may be issued at the request of the consumer.
- (3) When a consumer vacates any premises where a prepayment meter is installed, no refund for the credit remaining in the meter shall be made to the consumer by the Municipality.
- (4) The Municipality shall not be liable for the reinstatement of credit in a prepayment meter lost due to tampering with, or the incorrect use or the abuse of, prepayment meters or tokens.
- (5) Where a consumer is indebted to the Municipality for electricity consumed or to the Municipality for any other service supplied by the Municipality (including rates) or for any charges previously raised against him or her in connection with any service rendered, the Municipality may deduct a percentage from the amount tendered to offset the amount owing to the Municipality, as set out in the section 3 agreement for the supply of electricity.
- (6) The Municipality may, at its discretion, appoint vendors for the sale of credit for prepayment meters and shall not guarantee the continued operation of any vendor.

CHAPTER 6

In addition to the requirements of the Regulations the following requirements shall apply:

- (1) Where an application for a new or increased supply of electricity has been made to the Municipality, any duly authorized official of the Municipality may at his/her discretion accept notification of the completion of any part of an electrical installation, the circuit arrangements of which permit the electrical installation to be divided up into well-defined separate portions, and such part of the electrical installation may, at the discretion of any duly authorized official of the Municipality, be inspected, tested and connected to the supply mains as though it were a complete installation.
- (2) The examination, test and inspection that may be carried out at the discretion of the Municipality or any duly authorized official of the Municipality in no way relieves the electrical contractor/accredited person or the user or lessor, as the case may be, from his responsibility for any defect in the installation. Such examination, test and inspection shall not be taken under any circumstances (even where the electrical installation has been connected to the supply mains) as indicating or guaranteeing in any way that the electrical installation has been carried out efficiently with the most suitable materials for the purpose or that it is in accordance with this by-law or the safety standard, and the Municipality shall not be held responsible for any defect or fault in such electrical installation.

57. Liability

The Municipality shall not be held responsible for the work done by the electrical contractor/accredited person on a consumer's premises and shall not in any way be responsible for any loss or damage which may be occasioned by fire or by any accident arising from the state of the wiring on the premises.

CHAPTER 7

The Municipality may repair and make good any damage done in contravention of this by-law or resulting from a contravention of this by-law.  - (d) withholding payment of a grant-in-aid and subject to the provisions of section 32, excluding the account holder from the tender process;
 - (e) withholding payment on contracts for settlement of the municipal account;
 - (f) reviewing and altering the conditions of the service agreement;
 - (g) instituting legal proceedings for the recovery of the debt;
 - (h) classifying the account holder as an unreliable customer;
 - (i) using the services of external debt collection specialists or agencies;
 - (j) insisting on conversion to pre-paid metering at the cost of the account holder; or
 - (k) employing any other methods authorised by the municipality from time to time to recover arrear amounts.
- (5) The cost of collection, where applicable, is for the account holder's account.
- (6) Subject to the provisions of sections 28 and 29 of the Property Rates Act, 2004 Act 6 of 2004), the right to deny, restrict, disconnect or terminate services due to the non-payment for any rates, metered services, other municipal charges, levies, fees, fines, interest, taxes or any other amount or amounts payable arising from any other liability or obligation prevails notwithstanding the fact that —
 - (a) payment was intended for any specific service; or
 - (b) the person who entered into a service agreement for supply of services with the municipality and the owner are different entities or persons, as the case may be.

*Part 3 Metering equipment and metering of services***12. General provisions**

The municipality may introduce various metering equipment and may encourage an account holder to convert to a system which will benefit the municipality and account holders.

13. Metering equipment and measuring of consumption

- (1) The municipality must, at the consumer's cost in the form of a direct charge or prescribed fee, provide, install and maintain appropriately rated metering equipment at the point of metering for measuring metered services.
- (2) The municipality reserves the right to meter the supply to a block of shops, flats, tenement-houses and similar buildings for the building as a whole, or for an individual unit, or for a group of units.
- (3) Where any building referred to in subsection (2) is metered by the municipality as a whole -
 - (a) the owner may, at own cost, provide and install appropriate sub- metering equipment for each shop, flat and tenement; or
 - (b) the municipality may require the installation, at the account holder's expense, of a meter for each unit of any premises in separate occupation for the purpose of determining the quantity of metered services supplied to each such unit.
- (4) Where the electricity used by consumers is charged at different tariffs, the consumption must be metered separately for each tariff.
- (5) Where sub-metering equipment is installed, accommodation separate from the municipality's metering equipment must be provided where appropriate.

- (6) Except in the case of pre-payment meters, the quantity of metered services used by a consumer during any metering period is ascertained by reading the appropriate meter or meters supplied and installed by the municipality at the beginning and end of such metering period, except where the metering equipment is found to be defective.
- (7) For the purpose of calculating the amount due and payable for the quantity of metered services consumed, the same amount of metered services is deemed to be consumed during every period of 24 hours between readings.
- (8) The following apply to the accuracy of metering:
 - (a) a meter is conclusively presumed to be registering accurately if its error, when tested in the manner prescribed in subsection (13), is found to be within the limits of error as provided for in the applicable standard specifications;
 - (b) the municipality has the right to test its metering equipment, and if it is established by test or otherwise that such metering equipment is defective, the Municipality must —
 - (i) in case of a credit meter, adjust the account rendered; or
 - (ii) in the case of prepayment meters:
 - (aa) render an account where the meter has been under- registering; or
 - (bb) issue a free token where the meter has been over- registering; and
 - (c) the consumer is entitled to have the metering equipment tested by the municipality on payment of the prescribed fee, and if the metering equipment is found not to comply with the system accuracy requirements as provided for in the applicable standard specifications, an adjustment in accordance with the provisions of paragraph (b) and subsection (7) must be made and the aforesaid fee must be refunded.
- (9) No alterations, repairs, additions or connections of any description may be made on the supply side of the point of metering unless specifically approved in writing by the Municipal Manager.
- (10) Prior to the municipality making any upward adjustment to an account in terms of subsection (8)(b), the municipality must —
 - (a) notify the consumer in writing of the monetary value of the adjustment to be made and the reasons therefor;
 - (b) in such notification provide sufficient particulars to enable the consumer to submit representations thereon; and
 - (c) call upon the consumer in such notice to present it with reasons in writing, if any, within 21 days or such longer period as the municipality may permit, why the account should not be adjusted as notified, and should the consumer fail to provide any representation during the period the municipality is entitled to adjust the account as notified in paragraph (a).
- (11) The Municipality must consider any representation provided by the consumer in terms of subsection (10) and may adjust the account appropriately.
- (12) If the Municipal Manager decides that such representation does not establish a case warranting an amendment to the monetary value established in terms of subsection (15), the municipality is entitled to adjust the account as notified in terms of subsection (10)(a), and the consumer has the right to appeal the decision of the official in terms of section 62 of the Local Government: Municipal Systems Act, 2000 (Act 32 of 2000).
- (13) Meters are tested in the manner provided for in the applicable standard specifications.
- (14) When an adjustment is made to the consumption registered on a meter in terms of subsection (8)(b) or (8)(c), such adjustment is based either on the percentage error of the meter as determined by the test referred to in subsection (13), or upon a calculation by the Municipality from consumption data in its possession, and where applicable, due allowance must be made, where possible, for seasonal or other variations which may affect consumption.
- (15) When an adjustment is made as contemplated in subsection (14), the adjustment may not exceed a period of six months preceding the date on which the metering equipment was found to be inaccurate, however the application of this subsection does not bar a consumer from claiming back overpayment for any longer period where the consumer is able to prove the claim in the normal legal process.
- (16) The municipality may dispense with the use of a meter in case of —
 - (a) an automatic sprinkler fire installation; or
 - (b) special circumstances that may justify such dispensation.
- (17) The municipality may by notice—
 - (a) prohibit or restrict the consumption of metered services —
 - (i) for specified or non-specified purposes;
 - (ii) during specified hours of the day or on specified days or otherwise than during specified hours of the day or on specified days; and
 - (iii) in a specified or non-specified manner; and
 - (b) determine and impose —
 - (i) limits on the quantity of metered services which may be consumed over a specified period;
 - (ii) charges additional to those prescribed in respect of the supply of metered services in excess of a limit contemplated in subparagraph (i); and
 - (iii) a general surcharge on the prescribed charges in respect of the supply of metered services; and
 - (c) impose restrictions or prohibitions on the use or manner of use or disposition of an appliance by means of which metered services is used or consumed, or on the connection of such appliance.
- (18) The municipality may limit the application of the provisions of a notice contemplated by subsection (17) to specified areas and classes of account holders, premises and activities, and may provide for the Municipality to permit deviations and exemptions from, and the relaxation of any of the provisions.

- (19) To ensure compliance with a notice published in terms of subsection (17), the municipality may take, or by written notice require an account holder at the account holder's expense to take, such measures, including the installation of measuring devices and devices for restricting the flow of metered services as may be necessary.
- (20) In addition to the person by whose act or omission a contravention of or failure to comply with the terms of a notice published in terms of subsection (17) is actually committed, an account holder in respect of the premises to which metered services are supplied is presumed also to have committed the contravention or to have so failed to comply, unless evidence is adduced that the account holder had taken all reasonable steps to prevent such a contravention or failure to comply by any other person, however, the fact that the account holder issued instructions to the other person shall not of itself be accepted as sufficient proof that the account holder took all such reasonable steps.
- (21) The provisions of this section also apply in respect of metered services supplied directly by the municipality to account holders outside its area of jurisdiction, notwithstanding anything to the contrary in the conditions governing such supply, unless otherwise specified in the notice published in terms of subsection (17).
- (22) If action is necessary as a matter of urgency to prevent waste of metered services, refuse or sewerage, damage to property, danger to life, or pollution of water, the municipality may —
- (a) without prior notice disconnect the supply of metered services to any premises; and
 - (b) enter upon such premises and do emergency work, as it may deem necessary, and in addition by written notice require the account holder to do within a specified period such further work as the municipality may deem necessary;
- (23) The municipality may recover from the account holder the cost of any work undertaken in terms of subsection (22)(b) where such work was undertaken because of an unlawful act or omission by the account holder.
- (24) Before any metered or pre-paid metered supplies which have been disconnected or restricted for non-payment is restored, an account holder must pay all fees and charges as determined by the municipality, .
- (25) The municipality may, at the written request of an account holder and on the dates requested by the account holder —
- (a) disconnect the supply of metered services to the account holder's premises; and
 - (b) upon payment of the prescribed charge for restoration, restore the supply of such services..
- (26) After disconnection for non-payment of an account or a contravention of any provision of this by-law, the prescribed fees must be paid before reconnection is made.
- (27) The following apply to the reading of credit meters:
- (a) unless otherwise prescribed, credit meters are normally read at intervals of approximately one month and the fixed or minimum charges due in terms of the tariff are assessed accordingly and the municipality is not obliged to effect any adjustments to such charges;
 - (b) if for any reason the credit meter cannot be read, the municipality may render an estimated account, and estimated consumption must be adjusted in a subsequent account in accordance with the consumption actually consumed;
 - (c) when an account holder vacates a property and a final reading of the meter is not possible, an estimation of the consumption may be made and the final account rendered accordingly;
 - (d) if a special reading of the meter is desired by a consumer, this may be obtained upon payment of the prescribed fee; and
 - (e) if any calculating, reading or metering error is discovered in respect of any account rendered to a consumer —
 - (i) the error must be corrected in subsequent accounts;
 - (ii) any such correction applies only in respect of accounts for a period of six months preceding the date on which the error in the accounts was discovered,
 - (iii) the correction is based on the actual tariffs applicable during the period; and
 - (iv) the application of this section does not prevent a consumer from claiming back overpayment for any longer period where the consumer is able to prove the claim in the normal legal process.
- (28) The following apply to prepayment metering:
- (a) no refund of the amount tendered for the purchase of electricity or water credit is given at the point of sale after initiation of the process by which the pre-payment meter token is produced; provided that this section will only apply to Standard Transfer Specification equipment (STS tokens);
 - (b) copies of previously issued tokens for the transfer of credit to the pre-payment meter may be issued at the request of the consumer;
 - (c) when an account holder vacates any premises where a pre-payment meter is installed, no refund for the credit remaining in the meter is made to the owner by the municipality;
 - (d) the municipality is not liable for the re-instatement of credit in a prepayment meter lost due to tampering with, or the incorrect use or the abuse of, pre-payment meters or tokens;
 - (e) where an account holder is indebted to the municipality for any rates, metered services, other municipal charges, levies, fees, fines, interest, taxes or any other amount or amounts payable arising from any other liability or obligation, the municipality may deduct a percentage from the amount tendered to offset the amount owing to the municipality; and
 - (f) the municipality may appoint vendors for the sale of credit for prepayment meters and does not guarantee the continued operation of any vendor.

14. Resale of water or electricity

- (1) No account holder who is supplied with metered services in terms of this by-law may sell or supply water or electricity to any other person or persons for such use upon any premises other than those in respect of which such agreement is made, or permit or offer such resale or supply to be made, unless prior permission from the municipality has been obtained.
- (2) If the municipality grants the permission referred to in subsection (1), it may stipulate the maximum price at which the water or electricity may be sold and impose such other conditions as it may deem fit.

- (3) Permission referred to in subsection (1) may be withdrawn at any time.
- (4) Where water or electricity is resold for use on the same premises, such resale must be in accordance with the tariff and subject to such conditions as the municipality may impose.

Part 4 Indigence relief measures

15. Requirements for indigence relief

- (1) To qualify for indigence relief, the following requirements must be met:
 - (a) The applicant must be an account holder;
 - (b) the applicant must, before a date determined by the municipality, apply annually, or at such intervals as determined by the municipality, to be granted the status as a poor household, and for these purposes must—
 - (i) complete and sign the prescribed forms; and

 - (c) the applicant may not be the owner of more than one property and he or she must occupy the property; and
 - (d) the collective household income may not exceed the amount determined by the municipality in terms of subsection (2).
- (2) For the purposes of determining the collective household income as contemplated in subsection (1)(d), the municipality may stipulate an amount, or may determine a maximum amount based on any one or more of the following:
 - (a) consumption of water;
 - (b) consumption of electricity; or
 - (c) the municipal valuation of the property, which valuation may not exceed the value determined by the municipality .
- (3) In the case of a tenant —
 - (a) the tenant must apply in person and may qualify for electricity, water and refuse and sewage charges only, for which charges he or she must receive a municipal account; and
 - (b) the person receiving the rent payable by the tenant whether on the person's own account or as agent for any other person entitled thereto or interested therein, is responsible for rates.
- (4) In the instance where the account holder is deceased, the existing and future accounts of the household must be accepted under the indigence relief measures, on condition that only the surviving spouse or dependent children may apply or benefit.

- (4) Where it has been established that indigence relief has been granted on the basis of false or fraudulent information supplied, the municipality may withdraw such relief with immediate effect.

CHAPTER 3

TARIFFS

Part 1 General principles, calculation of tariffs for major services

17. General principles

- (1) The municipality adopts, subject to subsection (14), sections 20(3)(d) and (e) and 21(5)(d), a two-part tariff structure consisting of a fixed availability charge coupled with a charge based on consumption.
- (2) In setting its annual tariffs the municipality must at all times take due cognisance of the —
 - (a) tariffs applicable elsewhere in the economic region; and
 - (b) impact which its own tariffs may have on local economic development.
- (3) With the exception of the indigence relief measures approved by the municipality, service tariffs imposed by the municipality should be viewed as user charges and not as taxes, and the ability of the relevant consumer or user of the services to which such tariffs relate, to pay for such services, should not be considered as a relevant criterion.
- (4) The municipality must ensure that its tariffs are uniformly and fairly applied throughout the municipal area.

- (5) Tariffs for the following services rendered by the municipality, must as far as possible recover the expenses associated with the rendering of each service concerned, and, where feasible, generate a surplus as determined in each annual budget:
 - (a) supply of electricity;
 - (b) supply of water;
 - (c) sanitation services, including sewerage and waste water disposal services; and
 - (d) refuse (solids waste) removal services.
- (6) The tariff, which a particular consumer or user pays, must be directly related to the standard of service received and the quantity of the particular service used or consumed.
- (7) The municipality must annually review its indigence relief measures, as contemplated in sections 15 and 16, and must set out the —
 - (a) municipality's cost recovery policy in respect of the tariffs which it levies on registered indigents; and
 - (b) the implications of such policy for the tariffs which it imposes on other users and consumers in the municipal region.
- (8) (a) The municipality's tariff policy must be transparent.
 (b) The extent to which there is cross-subsidisation between categories of consumers or users must be evident to all consumers or users of the service in question.
- (9) The municipality undertakes to —
 - (a) ensure that its tariffs are explained to and understood by all consumers and users affected by this by-law;
 - (b) render its services cost effectively in order to ensure the best possible cost of service delivery.
- (10) In the case of the directly measurable services, namely electricity and water, the consumption of such services must be properly metered by the municipality, and meters must be read, wherever circumstances reasonably permit, on a monthly basis, and the charges levied on consumers must be proportionate to the quantity of the service which they consume.
- (11) In considering the costing of its water, electricity and sewerage services, the municipality must take due cognisance of the high capital cost of establishing and expanding such services, and of the resultant high fixed costs, as opposed to variable costs of operating these services.
- (12) (a) The municipality's tariffs for electricity services are determined to ensure that those consumers who are mainly responsible for peak demand, and therefore for the incurring by the municipality of the associated demand charges from Eskom, have to bear the costs associated with these charges.
 (b) For the purposes of paragraph (a), the municipality must install demand meters to measure the maximum demand of such consumers during certain periods.
 (c) Such consumers must pay the relevant demand charge as well as a service charge directly related to their actual consumption of electricity during the relevant metering period.

18. Calculation of tariffs for major services

In order to calculate the tariffs which must be charged for the supply of the services contemplated in section 17(5), the municipality must identify all the costs of operation of the undertakings concerned, including specifically the following:

- (a) cost of bulk purchases in the case of water and electricity;
- (b) distribution costs;
- (c) distribution losses in the case of electricity and water;
- (d) depreciation expenses;
- (e) maintenance of infrastructure and other fixed assets;
- (f) administration and service costs, including —
 - (i) service charges levied by other departments such as finance, human resources and legal services;
 - (ii) reasonable general overheads, such as the costs associated with the office of the municipal manager;
 - (iii) adequate contributions to the provisions for bad debts and obsolescence of stock; and
 - (iv) all other ordinary operating expenses associated with the service concerned including, in the case of the electricity service, the cost of providing street lighting in the municipal area; and
- (g) the cost of indigence relief measures.

Part 2 Structure of tariffs for major services, minor tariffs

19. Structure of tariffs

- (1) The municipality may—
 - (a) determine the kilowatt-hours of electricity per month and the kilolitres of water which will be provided free of charge to a consumer who have registered as an indigent in terms of section 15(1)(b); and
 - (b) consider relief in respect of the tariffs for sewerage and refuse removal for such registered indigent to the extent that the council deems such relief affordable in terms of each annual budget, however, such relief may not be less than a discount as determined by the municipality.
- (2) The tariff for a pre-paid meter is the same as the ordinary consumption tariffs levied on the category of consumer concerned, and no availability charge is levied on a property where a pre-paid meter has been installed.

20. Electricity

- (1) The various categories of electricity consumers, as set out in subsection (3), are charged at the applicable tariffs, as approved by the municipality in each annual budget.
- (2) Tariff adjustments are effective in respect of July accounts each year.
- (3) Categories of consumers and charges are as follows:
 - (a) with the exception of a registered indigent, a consumer must be billed for all the electricity consumed at the tariff applicable to the category in which the particular consumer falls.
 - (b) the tariff for domestic consumption of electricity may not exceed such percentage, per kilowatt-hours, as determined by the municipality, of the tariff applicable to other consumers, and all other consumers, including businesses, industries and institutional consumers, must pay the same tariff per kilowatt-hour.
 - (c) A domestic electricity consumer of the municipality who is registered as an indigent with the municipality must receive free the amount of kilowatt-hours of electricity as determined in terms of section 19(1).
 - (d) a domestic electricity consumer other than a registered indigent and sub-economic (Government subsidised Housing) consumer must additionally be billed an availability charge per meter installed.
 - (e) a commercial, industrial and other non-domestic property must additionally be billed a monthly availability charge per meter installed and, where applicable, a demand charge appropriate to its respective levels of consumption.

21. Water

- (1) The categories of water consumers as set out in subsection (5), are charged at the applicable tariffs, as approved by the municipality in each annual budget.
- (2) Tariff adjustments are effective in respect of July accounts each year.
- (3) The tariff levied for domestic consumption of water escalates according to the volume of water consumed, and will be based on a monthly consumption as determined by the municipality.
- (4) The tariff for non-domestic water consumption is based on a single tariff per kilolitre consumed, irrespective of the volume of consumption concerned.
- (5) Categories of consumers and charges are as follows:
 - (a) a domestic water consumer registered as an indigent with the municipality must receive free the first six kilolitre of water consumed per month, thereafter a tariff as determined by the municipality is applicable on metered water consumption.
 - (b) all other domestic consumers are charged for actual water consumption at a stepped tariff per kilolitre as determined by the municipality.
 - (c) the tariff applicable to domestic consumption of water may not exceed such percentage per kilolitre as determined by the municipality, of the tariff applicable to other consumers and all other consumers, including businesses, industries and institutional consumers, must pay the tariff as contemplated in subsection (4).
 - (d) an availability charge per water meter, as determined by the municipality, is charged on a water consumer.

22. Refuse removal

- (1) The categories of refuse removal users as set out in subsection (3) are charged at the applicable tariffs, as approved by the municipality in each annual budget.
- (2) Tariff adjustments are effective in respect of July accounts each year.
- (3) A separate fixed monthly refuse removal charge applies to each of the following categories of users, based on the costs of the service concerned:
 - (i) domestic and other users, where refuse is removed by the municipality once weekly; and
 - (ii) business and other users, where refuse is removed by the municipality twice weekly;
 - (iii) business and other users, where refuse is removed by the municipality thrice weekly; and
 - (iv) business and other bulk consumers.
- (4) A registered indigent may receive a discount on this charge as the municipality deems affordable when approving each annual budget, which discount may not be less than the percentage, as determined by the municipality, of the monthly amount billed as a refuse removal charge.

23. Sewerage

- (1) The categories of sewerage users as set out in subsection (3) are charged per month at the applicable tariff as approved by the municipality in each annual budget.
- (2) Tariff adjustments are effective in respect of July accounts each year.
- (3) Categories of users and charges are:
 - (a) an availability charge is charged per month or annually for an undeveloped erf, irrespective of its permitted or intended use.
 - (b) a fixed monthly charge based on the costs of the service, is charged for bucket removal for a domestic user, however, a registered indigent may receive such discount on this charge as the municipality deems affordable when approving each annual budget, which discount may not be less than the percentage, as determined by the municipality, of the monthly amount billed for this service.
 - (c) a fixed monthly charge based on the costs of the service is charged for adomestic user, however, a registered indigent may receive such discount on this charge as the municipality deems affordable when approving each annual budget, which discount may not be less than the percentage, as determined by the municipality, of the monthly amount billed for this service.

- (d) a fixed monthly charge based on the costs of the service per sewer point or toilet is charged to all businesses, industries and institutional users.
- (e) an effluent fee is payable by a factory and another industrial user where the wastewater emanating from such user requires special purification measures by the municipality, and the fee is based on the toxic content of the wastewater concerned and the costs of the purification.
- (f) a charge, based on the costs of the service to empty a septic tank, will be levied for each visit to empty a septic tank on the premises of a person requiring such service.

24. Minor tariffs

- (1) All minor tariffs are standardised within the municipal region.
- (2) All minor tariffs are approved by the municipality in each annual budget and are, when deemed appropriate by the municipality, subsidised by property rates and general revenues, particularly when the —
 - (a) tariffs prove uneconomical when charged to cover the cost of the service concerned;
 - (b) cost cannot accurately be determined; or
 - (c) tariff is designed purely to regulate rather than finance the use of the particular service or amenity.
- (3) Unless there are compelling reasons why such adjustment should not be effected, all minor tariffs over which the municipality has full control, and which are not directly related to the cost of a particular service, are adjusted annually at least in accordance with the prevailing consumer price index.
- (4) The following services are subsidised services, and the tariffs levied cover 50%, or as near as possible to 50%, of the annual operating expenses budgeted for the service concerned:
 - (a) burial services and the provision of cemeteries; and
 - (b) the provision of municipal sports facilities for use against a fee.
- (5) The following services are considered as being community services, and no tariffs are levied for their use:
 - (a) a municipal swimming pool;
 - (b) a municipal museum and art gallery;
 - (c) the disposal of garden refuse at the municipal disposal site;
 - (d) a municipal reference library;
 - (e) a municipal lending library, except for fines determined;
 - (f) a municipal botanical garden, other park or open space;
- (6) The following services are considered as being economic services, and the tariffs levied cover 100%, or as near as possible to 100%, of the budgeted annual operating expenses of the service concerned:
 - (a) The maintenance of graves, gardens of remembrance and crematoria against payment of a fee;
 - (b) the availability of a house against payment of a housing rental;
 - (c) subject to subsection (9), the use of a municipal hall and other premises against payment of a fee;
 - (d) the supply of a building plan against payment of a fee;
 - (e) the selling of —
 - (i) plastic refuse bags;
 - (ii) the selling of refuse bins; or
 - (iii) livestock and plants;
 - (f) the cleaning of stands against payment of a fee;
 - (g) the connection of electricity, water and sewerage against payment of a connection fee;
 - (h) the photostating of copies against payment of a fee; and
 - (i) the issuing of a clearance certificate against payment of a fee.
- (7) The following charges and tariffs are considered as regulatory or punitive, and are determined as appropriate in each annual budget:
 - (a) fines for lost or overdue library books;
 - (b) advertising sign fees;
 - (c) pound fees;
 - (d) disconnection and reconnection fees of electricity and water;
 - (e) penalty and other charges imposed in terms of Chapters 1 and 2; and
 - (f) penalty charges for the submission of dishonoured, stale, post-dated or otherwise unacceptable cheques.
- (8) The lease of a municipal property must be dealt with in terms of the Municipality's Supply Chain Management Regulations or Policy;
- (9) If the municipal manager is satisfied, in the case of a rental for the use of a municipal hall and premises, that the hall or premises is required for non-profit making purposes and for the provision of a service to the community, the municipal manager may waive the applicable rental.

- (10) The municipal manager must determine whether an indemnity or guarantee is to be lodged, or whether a deposit has to be paid, for the rental of a municipal hall, premises or sports field, and in so determining must be guided by the likelihood of the municipality's sustaining damages as a result of the use of the facilities concerned.
- (11) The costs of the democratic process in the municipality such as, but not limited to, all expenses associated with the political structures of the municipality, form part of the expenses to be financed from property rates and general revenues, and are not included in the costing of the major services of the municipality.

CHAPTER 4

RATES

25. Imposition of rates

- (1) The municipality must impose, as part of each annual operating budget component, a rate in the rand on the value of all rateable property as recorded in the municipality's valuation roll and supplementary valuation roll.
- (2) When imposing the rate for each financial year, the municipality must take proper cognisance of the —
 - (a) aggregate burden of rates and service charges on property owners in the various categories of property ownership; and
 - (b) extent to which this burden is or remains competitive with the comparable burden in other municipalities within the local economic region.

26. Rebates on rates

- (1) The municipality may grant rebates in recognition of the following factors:
 - (a) the inability of residential property owners to pass on the burden of rates, as opposed to the ability of the owners of business, commercial, industrial and certain other properties to recover such rates as part of the expenses associated with the goods or services which they produce;
 - (b) the need to accommodate indigents and less affluent pensioners;
 - (c) the services provided to the community by public service organisations;
 - (d) the value of agricultural activities to the local economy coupled with the limited municipal services extended to such activities, but also taking into account the municipal services provided to municipal residents who are employed in such activities;
 - (e) the need to preserve the cultural heritage of the local community;
 - (f) the need to encourage the expansion of public service infrastructure; and
 - (g) the indispensable contribution which property developers, especially in regard to commercial and industrial property development, make towards local economic development, and the continuing need to encourage such development.
- (2) The municipal manager must, subject to section 15(3) and 15(4) of the Property Rates Act, 2004 (Act 6 of 2004), ensure that rebates are indicated on the rates accounts submitted to each property.
- (3) The municipality may categorise properties and grant rebates as determined by it.
- (4) In determining whether a property forms part of a particular category contemplated in subsection (3), the municipality must have regard to the actual use to which the relevant property is put, and in the case of vacant land not specifically included in any of the categories, the permitted use of the property determines into which category it falls.
- (5) The rebates granted under subsection (3) apply in addition to the provisions of section 17(1)(h) of the Property Rates Act, 2004.
- (6)
 - (a) Subject to the provisions of section 9 of the Property Rates Act, 2004, a property, other than one referred to in section 17(1)(h)(i) of that Act, is rated on the value assigned to each component, and receives the rebate applicable to such component.
 - (b) where one component on average represents a higher percentage than that determined by the municipality, of the property's actual use, such property must be rated as though it were used for that use only.

27. Adjustment of rates

- (1) Where the rates levied on a particular property have been incorrectly determined, whether because of —

2. Objectives

The purpose of this by-law is to —

- (a) regulate the incorporation of solar water heaters for the production of sanitary hot water in buildings in the Greater Oudtshoorn area and to provide for matters connected therewith;
- (b) improve electrical energy security and improve energy risk management;
- (c) reduce the use of electricity;
- (d) reduce the national contribution to environmental impacts associated with the burning of fossil fuels, such as carbon dioxide (CO₂), sulphur dioxide (SO₂) and nitrous oxide emissions (NO₃);
- (e) improve the quality of life through the provision of hot water; and
- (f) create jobs in the solar water heater industry.

3. Scope of application

- (1) This By-law applies to all new buildings in the Oudtshoorn area, other than those exempted in subsection (3).
- (2) This By-law applies to all additions to existing buildings that will require the use of hot water (eg bathroom, bedroom with en-suite bathroom and kitchen extensions) other than those exempted in subsection (3).
- (3) This By-law does not apply to the following cases:
 - (a) Buildings used only for industrial purposes where hot water requirements exceed that which can be reasonably obtained through solar water heating;
 - (b) any privately funded residential building of which the extent is less than 120 m² (including garage space); or
 - (c) buildings with heat pump installations, as approved in terms of section 4.
- (4) The Municipality may exempt buildings or parts of buildings from the obligations of this By-law if there are valid reasons for such an exemption, such as —
 - (a) Historical Buildings; or
 - (b) buildings in areas which, due to permanent shading, are not able to have solar water heating.
- (5) Multi-storey buildings are required to have as much solar water heating as can be technically and economically accommodated by the structure and may apply for a notice of exemption for the hot water requirements not able to be served by a solar water heater.
- (6) No 'notice of exemption' will be valid unless given in writing over the signature of an authorised official.

4. Requirements for building plan approval

- (1) An application for building plan permission must disclose a description of the solar water heating system, showing compliance with this By-law.
- (2) The description referred to in subsection (1) must contain the following information:
 - (a) The manufacturer's name, trade name or trade mark;
 - (b) model number;
 - (c) aperture area; where an aperture area of 0.7m² per 50l of usage is deemed the minimum acceptable;
 - (d) whether the Solar water heater is freeze resistant or not freeze resistant;
 - (e) for domestic solar water heating, a signed declaration from the manufacturer or distributor regarding compliance of the solar water heater with SANS 1307;
 - (f) a declaration including the rated daily output according to SANS 6211-1 or SANS 6211-2 which should equal 80%, unless exemption has been granted in terms of section 3(4) or (5), provided that in the absence of SABS standards, international standards should be adhered to; and
 - (g) the name of the installer and the installing company.
- (3) The municipality may require information additional to those set out in subsection (2)

5. Standards

- (1) A domestic solar water heating system and its sub-components must comply with either SANS 1307 or certified international standards and compliance to those standards must be declared in writing.
- (2) The solar collector must be fitted in such a manner as to attain optimum performance given the constraints of the building geometry and orientation, and bearing in mind the requirements of section 4(2)(f), noting that a true North orientation and an inclination of the collector of 30° to the horizontal are optimal;
- (3) The installation of the solar water heating system shall be done according to National Codes of Practice SANS 10106 when they come into effect; until such time, the installation must be signed off by a certified installer in possession of an NQF level 4 certification or higher.
- (4) The manufacturer must give a written 5 year performance warranty declaration on the solar water heating system.
- (5) The municipality may require that a service contract be entered into between an installer and an owner and that it include at least:
 - (a) a commitment from the installer to perform a commissioning check within one month after installation, handing over the commissioning check list according to National Code of Practice SANS 10106 to the owner and that this commissioning check be included in the price of the system;
 - (b) a commitment from the installer to perform an annual service check at a reasonable fixed price stated in the contract, for a period of at least the two first years.
- (6) Any electrical work associated with the solar water heating system must comply with SANS 10142 South African National Standard for the Wiring of Premises.

6. Appearance and design

- (1) The municipality may require changes in the proposed design and appearance of a building in order to minimise the visual impact of the solar water heater.
- (2) Where possible, hot water cylinders must be installed within the roof space or internally—
 - (a) in areas of frost prevalence to address insulation concerns; or
 - (b) for aesthetic reasons in sensitive contexts such as buildings older than 60 years and in heritage areas.

7. Owners' obligations

- (1) The owner, or in the case where transfer to a final owner has not yet taken place, the developer of a building on which a solar water heater system is installed, is responsible for compliance with the requirements of this By-law.
- (2) The owner of the solar water heater system is responsible for maintenance and repairs necessary to keep it in good repair and functioning adequately.

8. Inspection

- (1) The Municipality may by written notice require an owner of a building to provide within a reasonable period any information it requires to give effect to this By-law.
- (2) If the information contemplated in subsection (1) is not provided within the time stated in the notice, the municipality may carry out an inspection of the building at the owner's cost to check compliance with the requirements of this By-law.
