 - (e) ensure that the need for and purpose of biosphere reserves, and the type of development to be allowed in and around biosphere reserves, are taken into account when any spatial development decision which may potentially impact on the biosphere reserves is taken.

Preliminary approval to establish biosphere reserve

3. (1) Any person, group of persons or organ of state may request the Minister to preliminarily approve the establishment of a biosphere reserve in the Province.

Framework plan for biosphere reserve

6. (1) The Management Committee must, as soon as possible after its appointment, prepare a spatial plan (in this Act referred to as a framework plan) for the biosphere reserve in accordance with the process principle of planning and the prescribed approval procedure.

(2) The Minister may determine conditions, in accordance with the process principle of planning, as to the manner in which the framework plan is to be drafted, and draft products and the approved plan are to be made known, which must include conditions with regard to inspection of draft products and representations by any interested and affected parties, including inhabitants of the area concerned, in the course of the preparation of the framework plan.

(3) Subject to subsection (4), the framework plan must comply and be consistent with any spatial framework or plan in terms of any legislation, including any—

(5) The Management Committee must within 12 months after designation of the biosphere reserve, or the longer period approved by the Minister, submit the framework plan to the Minister for approval.

(6) If the Minister approves the framework plan, it is regarded as a plan approved in terms of section 4(6) of the Land Use Planning Ordinance.

 - (iii) a proposed land use which does not comply with or is inconsistent with the framework plan may not be approved, unless the framework plan is appropriately amended, either before the approval concerned or simultaneously therewith.
- (b) In relation to a framework plan being approved, revised or amended in terms of this Act—

 - (ii) the framework plan is consistent with a higher level framework or plan existing under other legislation and functioning at a higher level in relation to the framework plan, if the designations of the higher level framework or plan do not explicitly provide for the proposals of the lower level framework plan, but those proposals in the particular locations would not conflict with the goals of the designations concerned; and

- (c) In relation to a framework plan existing in terms of this Act—
 - (i) a framework or plan existing under other legislation and functioning at a lower level in relation to the framework plan, complies with the framework plan if the designations of the framework plan explicitly provide for the proposals of the lower level framework or plan;

- (ii) a framework or plan existing under other legislation and functioning at a lower level in relation to the framework plan, is consistent with the framework plan if the designations of the framework plan do not explicitly provide for the proposals of the lower level framework or plan, but those proposals in the particular locations would not conflict with the goals of the designations concerned;
- (iii) a framework or plan contemplated under other legislation and intended to function at a lower level in relation to the framework plan must comply or be consistent with the framework plan, and may not be approved unless the framework plan is appropriately amended, either before the approval concerned or simultaneously therewith; and
- (iv) a framework or plan existing under other legislation and functioning at a lower level in relation to the framework plan must comply or be consistent with the framework plan, and may not be revised or amended in a way which does not comply with or is inconsistent with the framework plan, unless the framework plan is appropriately amended, either before the revision or amendment concerned or simultaneously therewith.
