THE TECHNOLOGY INNOVATION AGENCY (TIA) BILL

July 2007

MEMORANDUM ON THE OBJECTS OF THE BILL

1. PURPOSE OF BILL

1.1 The Technology Innovation Agency (TiA) Bill provides for the establishment of the TIA as a new public entity that is aimed at stimulating and intensifying innovation and inventions in order to improve economic growth as well as enhance the quality of life of all South Africans by developing and exploiting technological innovations and inventions and creating an enabling environment wherein these could be commercialised.

1.2 It was initially envisaged that the establishment of the TIA be enabled through amendments to the Inventions Development Act (No 31 of 1962). Due to the nature and proposed functions of the TIA, these however extend beyond the scope of amendments to the Inventions Development Act and it is therefore recommended that a new TIA Bill be introduced that would provide for the subsequent repeal of the Inventions Development Act.

2. OBJECTS OF BILL

2.1 As illustrated in the full TIA business case, investments for bringing new technology products and services to the market require substantial amounts of resources and it is therefore recommended that the form and function of the TIA should be such that enables revenue generation capacity of the Agency for re-investment into the system through, for example, equity shareholding and the facilitation of venture capital funding.

- 2.1.1 These requirements substantially differentiate the nature and form of the TIA such that are not provided for in the existing Inventions Development Act.
- 2.2 The TIA Bill provides for the appointment of the TIA Board, Executive and staff and sets out the objects, powers and functions of the Agency, which are, amongst other things to:
- 2.2.1 Support the State in stimulating and intensifying technological innovation and invention in order to improve economic growth and the quality of life of all South Africans by developing and exploiting technological innovations and inventions.
- 2.2.2 Provide financial assistance to any person, consortium, or enterprise for the purpose of enabling that person, consortium or enterprise to develop any technological innovation or invention.
- 2.2.3 Draw together and integrate the management of disparate technological innovation, inventions, incubation and diffusion initiatives in South Africa.
- 2.2.4 Develop the national capacity and infrastructure to protect and exploit intellectual property derived from publicly financed research.

3. **DEPARTMENTS/BODIES/PERSONS CONSULTED**

- 3.1 Science **Councils** and bodies including: the National Research Foundation (NRF) and the Innovation Fund; South African Bureau of Standards (SABS); the Human Sciences Research Council (HSRC); Council for Scientific and Industrial Research (CSIR); Medical Research Council (MRC); Agricultural Research Council (ARC); Council for Geosciences; Mintek; the Square Kilometer Array (SKA) project office; and, the National Advisory Council on Innovation (NACI).

- 3.2 Departments of: Trade and Industry (Dti); Education (DoE); National Treasury; Public Service and Administration (DPSA); Public Enterprises (OPE); Minerals and Energy (DME); Transport (DoT); Environmental Affairs and Tourism (DEAT); and the South African Police Services (SAPS).
- 3.3 Higher Education Institutions, including: **Tshwane** University of Technology (TUT); Stellenbosch University; University of Cape Town; University of the Western Cape (UWC); University of the Witwatersrand (Wits); Central University of Technology: Free State; University of Pretoria; Cape Peninsula University; University of Venda; University of the North West; University of Zululand; and the University of Johannesburg.
- 3.4 State Owned Enterprises and related public bodies: Industrial Development Corporation (IDC); Pebble Bed Modular Reactor (PBMR); Nuclear Energy Corporation of South Africa (NECSA); National Empowerment Fund (NEF); South African National Energy Research Institute (SANERI); Centre for Public Service Innovation; Eskom and Exxaro.
- 3.5 Financial Institutions, private sector and industry bodies: South African Venture Capital Association (SAVCA); Johannesburg Stock Exchange (JSE); Wholesale Venture Capital; Horizon Equity Partners; Triumph Venture Capital; Amplats; Sappi United; Anglo Platinum.
- 3.6 Science and Technology networking and collaboration bodies: Global Research Alliance (GRA); the Innovation Hub; Cooperation Framework on Innovation Systems between Finland and South Africa (COFISA); Da Vinci Institute; Technology Top 100 Awards network.

4. FINANCIAL IMPLICATIONS FOR STATE

- 4.1 The TIA in the first phase is a consolidation of existing initiatives and will therefore begin with a budget already allocated in the DST MTEF. This will be sufficient to achieve the goals of a conservative business plan. Further budget submissions will be made through the appropriate channels in order to realize a set of more ambitious goals to enable a much stronger technology base in the South African economy and improve on the country's competitiveness rating as well as trade balance.

5. **PARLIAMENTARY PROCEDURE**

- 5.1 The Department of Science and Technology is of the opinion that this Bill should be dealt with in terms of the procedure established by section 76 of the Constitution, since it contains provisions to which the procedure set out in section 76 of the Constitution applies.
