- (7) Parties who submit written comments or written representations must indicate whether they intend to make oral submissions in the event that the Authority decides to convene hearings.
- (8) A schedule setting out the hearing dates, should the Authority deem it necessary, will be published upon receipt of the written comments.

- VII. The administrative fee structure should be as simple as possible.
- VIII. the licence fees should be calculated in a transparent manner; and
- IX. The licence fees should be offset against commitments to construct ECN and provide ECS in rural and under-serviced areas.

Previously licence fees were based on either Gross Revenue or Net Operational Income. Whilst Gross Profit is internationally the more common definition, and encourages cost savings and effectively rewards efficiency, the Authority proposes using adjusted Gross Revenue to allow for the necessary deductions in the different licence categories.

#### **ANNUAL LICENCE FEES:**

The licence fee formula proposed in the attached regulation is based on a flat rate as a percentage of revenue.

The Authority's Operating expenses are projected to increase at a rate of 24% p.a for the first five years. Thereafter, the rate of increase is reduced to 8% p.a for the remaining five years (supported by historical figures and implementation of the Electronic Communications Act, in particular Chapter 10).

#### **ADMINISTRATIVE FEES:**

The Authority considered activity based costing in the formulation of the administrative fees, inflation, the new competitive framework provided by the ECA and other relevant factors.

## BACKGROUND

As part of the license conversion process undertaken in terms of section 93 of the ECA, the Authority conducted a workshop on 11 October 2007 wherein the Authority initiated discussions with and solicited opinions from industry players regarding the relevant principles to be considered in the formulation of license fees.

A comprehensive discussion yielded a set of principles which the Authority considered when revising/formulating the various fees. These "various fees" include:

- The applicable fees itemised in schedule 1 of the draft licensing procedure regulations contained in Government Gazette number 30363 of 9 October;
- The variable annual license fee payable by the licensees; and
- The determination of a once-off fee payable by licensees when a new license is granted.

In order to formulate a policy framework to guide the Authority, additional research was conducted and comprised an international benchmarking exercise as well as an analysis of the current licensing environment in South Africa.

## **LICENCE FEE FRAMEWORK**

The Authority thereafter adopted the following framework for the formulation of the licence fees regulations attached hereto:

- I. Licensees in possession of an individual licence should pay a larger portion of their revenues towards fees as compared to those in possession of Class licences, in view of the wider scope of operation permitted by their licence;
- II. The duration of the licence should be recognised as a significant factor when determining the value of the licence;
- III. Licensees with revenue below a certain threshold, for example R1 000 000.00 per annum, should pay marginal annual licence fees as a measure to support start ups and SMME's;
- IV. At minimum, the licence fees need to cover the cost of regulating the market;
- V. The licence fee should be structured in a manner that promotes a competitive ICT sector, and should not constitute a barrier to market entry;
- VI. The licence fees should facilitate the establishment of an environment conducive to network investments;
