DR B E NZIMANDE, MP
MINISTER OF HIGHER EDUCATION AND TRAINING
DATE: 26/09/2011

SCHEDULE 1

Definition and Criteria to Classify an Occupation as a Trade.

Section 26B of the Skills Development Act indicates that SETAs may apply to the Minister in the prescribed form to include an occupation as a listed trade in the Gazette.

In order to align the inclusion of any such occupation as a trade on the Gazetted list with established skills development planning processes, SETAs will be required to include such an application on the form as prescribed in the procedure of submitting new occupations to the Department for inclusion on the Organizing Framework of Occupations (OFO).

However any occupation that a SETA wants to be included as a trade on the OFO must first be submitted to the National Artisan Moderation Body (NAMB) for evaluation and possible endorsement that the occupation meets the criteria for classification of an occupation as an Artisan Trade.

The relevant forms to request new occupations on the OFO have been adjusted to include the submission of such an application by a SETA to NAMB should the SETA wish to do so.

In this regard the Skills Development Amendment Act defines:

- An artisan as “a person who has been certified as competent to perform a listed trade in accordance with the Skills Development Act”
- A trade is “an occupation for which an artisan qualification is required in terms of Section 26 B” of the Skills Development Act.

From the above definitions it becomes apparent that “artisan” and “trade” mean the same and can be used interchangeably.

The NAMB will utilize the titles, descriptors, alternate titles, and tasks from the prevailing version of the OFO as the basis to determine which occupations are trades and can be listed by the Minister.

Criteria that will be utilized by NAMB to classify occupations as Artisan Trades.

The occupational titles, descriptors, alternate titles, and tasks will be compared to the following broad generic description of an artisan:

An occupation where in a qualified person applies a high level of practical skills supported and re-enforced by underpinning and applied knowledge to:

- Manufacture, produce, service, install or maintain tangible goods, products or equipment in an engineering and/or technical work environment;
- Uses tools and equipment to perform his/her duties;
- Measure and do fault finding on process, manufacturing, production and/or technical machinery and equipment to apply corrective or repair actions;
- Apply and adhere to all relevant health, safety and environmental legislation; and
- Has an accumulative learning period covering knowledge, practical and workplace learning that is equivalent to three or more years.

The route to achieve artisan status will also be considered as such a route is uniquely characteristic of an artisan occupation and usually includes features such as:

- ♦ a structured learning programme of knowledge, practical and work experience;
- ♦ a structured learning programme that must be successfully completed before a final assessment is attempted; and
- ♦ a final external summative assessment that must be passed and is known as a trade test.

Historic and global classification of occupations as artisans or trades will also be considered.

Any occupation that is determined by NAMB to align to the above criteria will be endorsed for classification as an artisan trade.

SCHEDULE 2

Occupations to be listed as trades for which artisan qualifications are required:

The list below is based on the prevailing version of the Organising Framework for Occupations (OFO) which is a skills development planning coding system for occupations aligned to the South African Standard Classification of Occupations (SASCO) and the International Standard Classifications of Occupations (ISCO) as issued by the International Labour Organisation (ILO).

Column 1 gives the prevailing **OFO Code** for the Occupation, with each primary title of occupation having a unique code.

Column 2 gives the prevailing **Primary Title of the Occupation**, a unique title that will appear on the Certificate that is issued to a person once declared competent for that trade.

Column 3 gives a **Category of Trade** that groups trades together that have similar attributes and that allows for a progressive rationalisation of trades into vocational groups. This is important for the efficient and effective development of learning curriculum and routes since many of the trades in the same category may require the same initial basic training, progressively becoming more specific to the trade over the duration of the training period.

Column 4 gives the prevailing **Alternate Title of the Occupation** that allows members of industry and the public to identify the title of the artisan trade that is possibly used within the context of their industry and/or community. Both the primary title in Column 2 and the alternate title in Column 4 must be scrutinised by stakeholders to ensure that all artisan trades are reflected in the list.
