1. I, Mrs B E E Molewa, in my capacity as the Minister of Water and Environmental Affairs, hereby levy, in terms of the authority vested in me by section 11 of the Water Research Act, 1971 (Act No. 34 of 1971), the following rates and charges:
 - (a) Four hundred and forty nine cents (449c) in respect of each hectare of land of which the water use is permissible during the 2011/2012 water year in terms of section 22(1)(a)(ii) of the National Water Act, 1998 (Act No. 36 of 1998), or in respect of which an allocation has been made under Chapter 4 of the said National Water Act for the irrigation thereof at any time during the said water year, with water supplied or made available from any government water work. These rates and charges shall be recovered by or on the instructions of the Director-General: Water Affairs, simultaneously with any other charge which I may make in respect of the land concerned during the said period in terms of section 57 of the said National Water Act or, if no such charge is made, the charge shall be payable upon demand to the Director-General: Water Affairs.
 - (b) The amount mentioned in 1(a) above shall apply in respect of each hectare of land permitted under the control of an irrigation board or other water management institution established in terms of the said National Water Act for the irrigation of land at any time during the 2011/2012 financial year of such board or institution with water supplied or made available from a government water work or a water work belonging to such board or institution. 1. Introduction

The South African government is a signatory to the London Convention on the Prevention of Marine Pollution by Dumping of Wastes and Other Matter (1972) (the London Convention) and to the 1996 Protocol to the London Convention (the London Protocol). The London Convention and London Protocol regulate the deliberate disposal of waste materials in the marine environment. In South Africa, the Integrated Coastal Management Act 2008 (Act 24 of 2008) gives effect to the provisions of the London Convention and London Protocol. There are seven categories of waste and other material that are regulated under the ICM Act. Of these, the largest volume of material that requires disposal in offshore waters of South Africa is dredged material, derived predominantly from maintenance and capital dredging in ports.

The branch Oceans and Coasts of the Department of Environmental Affairs is mandated with the responsibility for regulating the disposal of materials in the marine environment off South Africa. As per the conditions of the London Convention and the London Protocol, Oceans and Coasts uses a National Action List to make decisions on whether sediment proposed for dredging is of a suitable quality for unconfined, open water disposal.

2. What is an Action List?

An Action List is a mechanism that allows managers and regulatory authorities to reach an informed decision on the suitability of material proposed for disposal in the marine environment. An Action List is comprised of one or more Action Levels. In the context of the disposal of dredged material, the Action Levels provide the decision criteria for determining whether the material:

1. Is suitable for unconfined, open water disposal without further testing,
2. Must undergo detailed testing before a decision can be made, or
3. Is unacceptable for unconfined, open water disposal and requires special management.

Action Levels may comprise one or more criteria that are used to identify whether the environmental concern is low or high for a particular characteristic

of concern. The characteristics of concern in dredged material might include the concentrations of chemicals, a biological response, or other characteristics that provide insight into the potential for the sediment to cause adverse biological effects in the marine environment. An Action Level may thus comprise criteria for a combination of physical, chemical and biological characteristics.

An upper Action Level is intended to provide a definitive decision point where the waste material under consideration may not be disposed unless further managed.

3. The National Action List

At this time the South African National Action List (Table 1) that will be used to identify management options for sediment proposed for dredging is comprised only of sediment quality guidelines.

There is presently insufficient matching sediment chemistry, toxicity and benthic invertebrate community data for South African coastal waters to allow for the derivation of empirical sediment quality guidelines. The sediment quality guidelines of the National Action List were consequently adopted from sediment quality guidelines derived for application in certain jurisdictions of the United States of America and Canada.

Candidate sediment quality guidelines were identified using baseline concentrations for metals in sediment from South African coastal waters. The baseline

Two Warning Level concentrations are included for chromium and nickel to account for differences in the baseline concentrations for these metals between Eastern Cape and KwaZulu-Natal coastal waters.

a - Environment Canada and MDDEP (2007), b - USACE (2006), c - Long et al. (1995), d - for Eastern Cape, e - for KwaZulu-Natal

concentrations were used to screen sediment quality guidelines that are not suitable as they prescribe concentrations that are lower than the baseline concentrations. Four candidate sediment quality guidelines were identified through this process, namely guidelines derived for application in Quebec, Canada (EC and MDDEP 2007), British Columbia, Canada (MacDonald et al. 2003), and the Pacific Northwest of the United States of America (USACE 2006, USACE 2008).

Most of the Level I and Level II guidelines of the National Action List were taken from USACE (2006). Since USACE (2006) Level I and Level II guidelines for copper are identical, the Level I guideline was substituted with the Level II guideline of the Quebec sediment quality guidelines (EC and MDDEP 2007). The USACE (2006) Level I guideline for lead is high and was replaced with the more protective Level II guideline from the Long et al. (1995) sediment quality guidelines. The USACE (2006) Level II guidelines for cadmium and chromium are not much higher than the Level I guidelines and were also replaced by the Level II guidelines from the Long et al. (1995) sediment quality guidelines.

The Warning Level for most metals correspond to the Probable Effects Level of the Quebec sediment quality guidelines (EC and MDDEP 2007), but guidelines were also taken from the USACE (2006) and Long et al. (1995) sediment quality guidelines. The guidelines for chromium and nickel in the latter sediment quality guidelines were limited from some perspective and the Warning Level for these metals was consequently derived using the Sediment Background approach, as 1.5 times the baseline concentration at a co-occurring aluminium concentration of 60 mg.g⁻¹.

Three guidelines were identified, namely a Warning Level and Level I and Level II guidelines. The Warning Level is intended to provide a warning of incipient contamination, but will not be used for decision-making in the National Action List. The Level I and Level II guidelines will comprise the Action Levels of the National Action List, and decision will be made using these guidelines.

4. Scope of application

The National Action List should only be used to identify management options for sediment proposed for dredging in South African ports. The National Action List should not be used to assess sediment quality in aquatic ecosystems outside of ports for the reason that the guidelines are relatively high and may not be sufficiently protective for less anthropogenically disturbed systems.

The National Action List *per se* does not consider impacts associated with dredging and spoil disposal activities. These impacts include, for example, the physical disturbance of sediment habitat and the impairment of water quality through increased levels of turbidity.

The sediment quality guidelines of the National Action list should not be viewed as 'pollute up to' lines for port environments. The concentrations of metals specified by the guidelines are higher than baseline concentrations in sediment from South African coastal waters and contamination will already have occurred by the time that the concentrations exceed the lowest guideline.

5. Decision-making criteria

At this time there are no decision-making criteria associated with the National Action List. Decision-making criteria will be developed in due course.

NOTICE 869 OF 2011**INVITATION FOR PUBLIC COMMENTS ON SASOL GAS LIMITED'S APPLICATION FOR REVOCATION OF LICENCE IN TERMS OF SECTION 25 OF THE GAS ACT, 2001**

The National Energy Regulator (NERSA) is a regulatory authority established as a juristic person in terms of section 3 of the National Energy Regulator Act, 2004 (Act No. 40 of 2004). NERSA's mandate is to regulate the electricity, piped-gas and petroleum pipelines industries in terms of the Electricity Regulation Act, 2006 (Act No. 4 of 2006), Gas Act, 2001 (Act No. 48 of 2001) and Petroleum Pipelines Act, 2003 (Act No. 60 of 2003).

Members of the public and stakeholders are hereby notified that NERSA has received an application for revocation of the following licence:

LICENCE NUMBER	APPLICANT AND LICENSEE	LICENCE DESCRIPTION
Gala.t.F1/1411/2008	Sasol Gas Limited	Licence to construct a gas transmission facility at the Alton Industrial Area (uMhlathuze Local Municipality), KwaZulu-Natal

This licence was granted by NERSA to Sasol Gas Limited ("Sasol Gas") on 23 November 2009 for the construction of a gas transmission facility at Alton Industrial Area to connect Spring Lights Gas (Pty) Ltd to the existing gas network in order that they could on-sell their methane-rich gas purchased from Sasol Gas to Pulp United.

The reason advanced by Sasol Gas for the sought licence revocation is that the licensed facility or activity concerned is no longer required. The explanation provided by Sasol Gas in support of this reason is that the Municipality subsequently approved a different route from the one in respect of which NERSA granted the abovementioned licence, as a result of which a new application reflecting the approved route was submitted to NERSA and was granted under licence number Gala.t.F1/1476/2010 on 06 April 2011.

Section 25(1)(a) of the Gas Act, 2001 allows a licensee to apply for revocation of its licence, and NERSA to grant such application, if the licensed facility or activity to which the licence concerned relates is no longer required. In terms of section 10(1)(d) of the National Energy Regulator Act 2004, however, every decision of NERSA must be taken within a procedurally fair process in which affected persons are given the opportunity to submit their views and present relevant facts and evidence to NERSA.

In order to enable NERSA to make an informed decision on this licence revocation application, members of the public and stakeholders are hereby invited to submit their written comments in connection with the proposed licence revocation to The Executive Manager: Piped Gas, Kulawula House, 526 Vermeulen Street, ARCADIA, 0083; tel. (012) 401 4028, fax no. (012) 401 4700 or email at pipedgas@nersa.org.za. This invitation for public comments is being made in terms of regulation 18(2)(a) of the Regulations on Fair Administrative Procedures published in Government Notice No.R1022 of 31 July 2002 (Government Gazette No. 23674),

The closing date for receipt of public comments is 09 January 2012 at 16h00, and all comments received after the closing date will be disregarded.

All other enquiries may be directed to Mr Thulebona Nxumalo or Ms Lindiwe Mvuyana at:
