Note the following potential allocation conditions may apply to the final licenses and in accordance to a water use management plan:

- (1) Water was allocated using a benchmark of efficient water use in terms of Section 27(1)c of the National Water Act (Act 36 of 1998).
- (2) Monthly allocations from surface water, particularly during the stressed months (Dec, Jan, Feb & Mar), may be lower than existing water use and demands.
- (3) Water allocation to all irrigation users will be made at an acceptable assurance of supply for the catchment, in accordance with Section 31 of the National Water Act (Act 36 of 1998).
- (4) The Cederberg Municipality's water use from the Jan Dissels River may be switched to the Clanwilliam Dam, between the start of December to the end of March.
- (5) The lower Jan Dissels River water users may be switched to the Olifants River, between the start of December to the end of March, where feasible.
- (6) The Taaiboschkraal River, at the diversion, may be returned to its natural course and thus to the Jan Dissels River, between the start of January to the end of March.
