COMPETITION COMMISSION SOUTH AFRICA**TERMS OF REFERENCE****RISK MANAGEMENT 2012/1****Introduction:**

1. The Competition Commission of South Africa (hereinafter referred to as the Commission) was established in terms of the Competition Act No. 89 of 1998, as amended (the Act). The Commission is one of three bodies established in terms of the Competition Act. It is an independent statutory authority created with the objective of regulating economic activity within the country. The Commission is empowered to investigate, control and evaluate restrictive business practices, abuse of dominant positions and mergers in order to achieve equity and efficiency in the South African Economy.
2. The Commission was established in terms of the Act, and is responsible for promoting competitive market conditions. The Commission's activities revolve around: The investigation, prevention and prosecution of horizontal or vertical restrictive practices that are prohibited in terms of the Act; the investigation and prosecution of the abuse of dominance, which includes price discrimination, exclusionary acts, and excessive pricing; merger reviews and analysis to determine whether a proposed merger would prevent or lessen competition, as well as its impact on public interest issues such as employment and Black Economic Empowerment; the analysis of exemption applications in terms of section 10 and Schedule 1 of the Act; and advocating for key stakeholders to make competition sensitive decisions, either in formulating policy and legislation or in conducting their day-to-day business. The Commission consists of approximately 170 staff members across the following 8 divisions:
 - a. The Commissioners Office,
 - b. Advocacy and Stakeholder Relations,

COMPETITION COMMISSION SOUTH AFRICA

TERMS OF REFERENCE

FACILITATION AND DEVELOPMENT OF A STRATEGY FOR THE COMPETITION COMMISSION OF SOUTH AFRICA

STRATEGY 2012/2

Introduction:

The Competition Commission of South Africa (hereinafter the Commission) was established in terms of the Competition Act No. 89 of 1998. The Competition Commission is one of three bodies established in terms of the Competition Act. It is an independent statutory authority created with the objective of regulating economic activity within the country. The Commission is empowered to investigate, control and evaluate restrictive business practices, abuse of dominant positions and mergers in order to achieve equity and efficiency in the South African Economy.

The Commission is embarking on a process of developing a five-year strategy for the period 2014 to 2019 and an annual performance plan for the 2014/15 period, in line with the requirements for public entities. The Commission seeks to appoint a service provider to facilitate the development of the strategic plan and the annual performance plan.

Background:

The Commission has since 2006 developed and implemented two strategic plans that together constitute its 1st generation strategy implementation activities. The strategic planning activities include a process of analysing the organisation's external and internal environments and taking these into account, defining its new priorities.

Table 1: 1st Generation Strategic Plan Environmental Factors and Strategic Priorities:

April 2007 – March 2010	April 2010 – March 2013
External Environment	External Environment
<ul style="list-style-type: none"> • Expanding economic activity • Competition policy review • Increasing sophistication • Impact assessment • Increasing profile 	<ul style="list-style-type: none"> • Global economic crisis • Implementation of changes to the Competition Act • Strategic engagement opportunities • Increasing expectations
Internal Environment	Internal Environment
<ul style="list-style-type: none"> • Governance • Structure • Human resource • Culture and climate • Information and knowledge management 	<ul style="list-style-type: none"> • Continued organisational growth and expansion • Empowering middle management • Leading and managing change • Information and knowledge management
Strategic Priorities	Strategic Priorities
<ul style="list-style-type: none"> • Increase staff morale and motivation • Align organisational structure and work processes to the Strategy • Defining and clarifying the Commission's approach and methodology • Establish the Commission as a centre of information, knowledge and expertise • Ensure effective advocacy and communication 	<ul style="list-style-type: none"> • Achieved demonstrable competitive outcomes in the economy • Improved competitive environment for economic activity • Realised a high performance competition regulatory agency

The 2nd generation strategy needs to build on the lessons learnt and the planning practices already established. The strategic plan is expected to contribute to the Commission's preparedness to identify opportunities available in its environment; provided a framework and criteria for prioritisation; create a narrative of the Commission's future that assists in communicating the outcomes the Commission seeks to achieve; and provide a mechanism to facilitate resource allocation for priorities areas of work. The strategic plan should effectively enable the Commission to respond to the changes in its environment, build on its existing capacities, and improve its organisational performance.

Purpose:

The main purpose of the assignment is to provide technical assistance and facilitation services in support of the strategic planning process that the organisation is embarking on. The services will include the design and facilitation of the strategic planning process, preparation of the strategic planning workshop report and the development of the strategy and strategy implementation plan as well as the annual performance plan for the Commission.

Scope of work:

The service provider will be expected to undertake a desktop review and document analysis, conduct a situational analysis, design the strategic planning session, facilitate the strategic planning process, and develop the five-year strategy and implementation plan, as well as the annual performance plan, for the Commission.

The desktop review and analysis will include a review of all previous planning documents and reports, workshop documents, input papers prepared specifically for the strategic planning process, and international best practice with reference to competition authorities in other jurisdictions and international networks such as the International Competition Network. The review should be aimed at determining the international trends in competition regulation, identifying the key strategic issues facing the Commission and the key dynamics in the environment likely to impact the work of the Commission over the next five years.

The situational analysis will involve a series of interviews with senior management and other staff as well as a select number of critical stakeholders. These interviews should be aimed at gaining insights on the expectations of the senior management team in respect of the strategic planning process and its outcomes; the main stakeholder expectations; and the organisation's strengths and weaknesses.

The workshop design and preparation process should clearly spell out how the strategic plan will be developed. It should communicate the methodologies that will be used in generating the required data and information, the different interactions and workshops with Commission staff, and the levels of participation required across the organisation and by external stakeholders.

The facilitation process involves the facilitation of the strategic planning processes that will result in the production of the strategic plan. The workshops will draw on all the available information collected through the desktop review, situational analysis and interactions with stakeholders.

The strategic planning process should focus, among other things, on the following:

- The degree to which the values are consistent with the outcomes the Commission seeks to achieve;
- A strategic vision for the organisation that is understood by all staff;
- Priorities for the organisation and strategies to address these;
- Outcomes, outputs, targets, and major activities;
- Comprehensive performance indicators that enables the Commission to track, monitor and review progress against targets;
- Reflections on the appropriate organisation design and capacity relative to the strategic goals and outcomes;
- Resource and budgetary requirements for implementing the strategic plan;
- The strategy monitoring, review and reporting requirements;
- Mechanisms for integrating the strategic priorities into the Annual Performance Plan.

Deliverables:

The service provider will be expected to deliver a series of interim deliverables before submitting the strategic plan and annual performance plan as the final deliverable:

- **Situational Analysis Report**—strategic planning input report on international trends in competition regulation; key strategic issues facing the Commission; key dynamics in the environment likely to impact the work of the Commission; insights on the expectations of the senior management team; stakeholder expectations; and organisational strengths and weaknesses.

- **Annual Performance Plan**—Final Annual Performance Plan for the 2014/15 financial year.

Time Frames:

The service provider will be expected to commence on 18 February 2013 and complete the strategy facilitation and development process with the five year strategic plan and annual performance plan submitted no later than 30 April 2013.

Reporting:

The service provider will report to the Company Secretary.
