Note that the following allocation rules or conditions may apply to the final licences and in accordance to a water use management plan:

- (1) Water was allocated using benchmark of efficient water use in terms of Section S27(1)c of the National Water Act (Act 36 of 1998).
- (2) Allocations from surface water, particularly during the stressed months (Dec, Jan, Feb & Mar), may be lower than existing water use and demands.
- (3) A reasonable phase-in period will be allowed for adaptation due to curtailment or changes from current sources to different sources by existing users, depending upon the infrastructure and financial requirements.
- (4) The Cederberg Municipality's water use from the Jan Dissels River may be switched to the Clanwilliam Dam, between the start of December to the end of March.
- (5) The lower Jan Dissels River water users may be switched to the Olifants River, between the start of December to the end of March, where feasible.
- (6) The Taiboschkraal River diversion may be returned to its natural course and to the Jan Dissels River, between the start of January to the end of March.
