The HDA will not incur any liability to a tenderer for such cancellation and rejection, but will give written reasons for such action upon request to do so.

COMPETITION COMMISSION OF SOUTH AFRICA

STRATEGY TENDER

TENDER NUMBER: 2013/STRATEGY

The Competition Commission of South Africa (hereinafter the Commission) was established in terms of the Competition Act No. 89 of 1998. The Competition Commission is one of three bodies established in terms of the Competition Act. It is an independent statutory authority created with the objective of regulating economic activity within the country. The Commission is empowered to investigate, control and evaluate restrictive business practices, abuse of dominant positions and mergers in order to achieve equity and efficiency in the South African Economy.

The Commission is embarking on a process of developing a five-year strategy for the period 2014 to 2019 and an annual performance plan for the 2014/15 period, in line with the requirements for public entities. The Commission seeks to appoint a service provider to facilitate the development of the strategic plan and the annual performance plan.

Services required

Scope of work:

The service provider will be expected to undertake a desktop review and document analysis, conduct a situational analysis, design the strategic planning session, facilitate the strategic planning process, and develop the five-year strategy and implementation plan, as well as the annual performance plan, for the Commission.

The desktop review and analysis will include a review of all previous planning documents and reports, workshop documents, input papers prepared specifically for the strategic planning process, and international best practice with reference to competition authorities in other jurisdictions and international networks such as the International Competition Network. The review should be aimed at determining the international trends in competition regulation, identifying the key strategic issues facing the Commission and the key dynamics in the environment likely to impact the work of the Commission over the next five years.

The situational analysis will involve a series of interviews with senior management and other staff as well as a select number of critical stakeholders. These interviews should be aimed at gaining insights on the expectations of the senior management team in respect of the strategic planning process and its outcomes; the main stakeholder expectations; and the organisation's strengths and weaknesses.

The workshop design and preparation process should clearly spell out how the strategic plan will be developed. It should communicate the methodologies that will be used in generating the required data and information, the different interactions and workshops with Commission staff, and the levels of participation required across the organisation and by external stakeholders.

The facilitation process involves the facilitation of the strategic planning processes that will result in the production of the strategic plan. The workshops will draw on all the available information collected through the desktop review, situational analysis and interactions with stakeholders.

The strategic planning process should focus, among other things, on the following:

- The degree to which the values are consistent with the outcomes the Commission seeks to achieve;
- A strategic vision for the organisation that is understood by all staff;

- Priorities for the organisation and strategies to address these;
- Outcomes, outputs, targets, and major activities;
- Comprehensive performance indicators that enables the Commission to track, monitor and review progress against targets;
- Reflections on the appropriate organisation design and capacity relative to the strategic goals and outcomes;
- Resource and budgetary requirements for implementing the strategic plan;
- The strategy monitoring, review and reporting requirements;
- Mechanisms for integrating the strategic priorities into the Annual Performance Plan.

Deliverables:

The service provider will be expected to deliver a series of interim deliverables before submitting the strategic plan and annual performance plan as the final deliverable:

- **Situational Analysis Report**—strategic planning input report on international trends in competition regulation; key strategic issues facing the Commission; key dynamics in the environment likely to impact the work of the Commission; insights on the expectations of the senior management team; stakeholder expectations; and organisational strengths and weaknesses.
- **Workshop Design Report**—Report setting out the workshop design with reference to levels of participation across the organisation; thematic sessions and outcomes; methodologies; workshop agenda; and pre-workshop preparation and documentation.
- **Workshop Report**—Record of the strategic planning workshop(s).
