MINISTER WATER AND SANITATION

Explanatory Note

National Government has overall responsibility for and authority over water resource management, including the equitable allocation and beneficial use of water in the public interest.

A person may only use water if the use is permissible under the National Water Act, no 36 of 1998. In general, a water use must be licensed unless it is listed in Schedule 1, is an existing lawful use, is permissible under a general authorisation or if a responsible authority dispenses with the requirement for a licence.

An integrated process has been designed to address issues relating to environmental laws in mining areas, which needs to be applied in a well co-ordinated, structured and synchronised manner, which will give effect to the “one environmental system”.
