WARNING!!!

To all suppliers and potential suppliers of goods to the Government Printing Works

The Government Printing Works would like to warn members of the public against an organised syndicate(s) scamming unsuspecting members of the public and claiming to act on behalf of the Government Printing Works.

One of the ways in which the syndicate operates is by requesting quotations for various goods and services on a quotation form with the logo of the Government Printing Works. Once the official order is placed the syndicate requesting upfront payment before delivery will take place. Once the upfront payment is done the syndicate do not deliver the goods and service provider then expect payment from Government Printing Works.

Government Printing Works condemns such illegal activities and encourages service providers to confirm the legitimacy of purchase orders with GPW SCM, prior to processing and delivery of goods.

To confirm the legitimacy of purchase orders, please contact:

Chapter 1 Introduction

2. Contextual Background

South Africans speak approximately 25 different languages. 11 of these languages have been granted the status of official language in terms of the Constitution due to these being spoken by 98% of the South African population. The 11 official languages are isiNdebele, isiXhosa, isiZulu and siSwati (referred to as the Nguni language group); Sesotho, Sepedi and Setswana (referred to as the Sotho language group); Tshivenda, Xitsonga, English and Afrikaans. Thus it is that South Africa may be regarded as a multilingual country.

While the Constitution sets out the need for all official languages to enjoy parity of esteem and be treated equitably, linguistic diversity in post-apartheid South Africa has been problematic due to the lack of a clearly defined language policy. The Use of Official Languages Act has thus been introduced. The Act aims to ensure through its objectives that:

- National government may regulate and monitor the use of official languages for government purposes,
- Promote parity of esteem and equitable treatment of official languages of the Republic,
- Facilitate equitable access to services and information of national government, and
- Promote good language management by national government for efficient public service administration and to meet the needs of the public.

The South African State Theatre (SAST), a PFMA schedule 3A public entity of the National Department of Arts and Culture, is tasked with promotion, development and mainstreaming the role in socio-economic development of the performing arts, culture and heritage programmes. Situated in the Capital city of South Africa, Tshwane, SAST serves predominantly the Tshwane public as well as greater Gauteng as its main audience. However, SAST functions as a national platform for the South African performing arts sector attracting public participation from communities and mainstream performers situated across the Republic. SAST is thus tasked to deliver public

services to both audiences and performers. The performing arts sector is a multilingual concentration of people which SAST serves.

In order to comply with the Act, promote the provisions of the Constitution and serve its diverse multilingual public, SAST has introduced this Official Language Policy. This Policy aims to provide SAST with a framework for the use of official languages when communicating with both internal and external stakeholders.

3. Purpose

Section 4(1) of the Act provides that every national department, national public entity and national public enterprise must adopt a language policy on its use of official languages. This policy aims to comply with this requirement of the Act. In doing so, SAST adheres to a linguistic approach that accommodates linguistic diversity relevant to its mandate.

The purpose of this policy is to provide for the use of official languages in all aspects of SAST communication by:

- Establishing the criteria for selection of the appropriate official language that SAST will use for communication under different contexts; and
- Establishing the official language of SAST.

4. Scope

This policy, together with any related policies, is applicable to the South African State Theatre, its employees, members of Council, Stakeholders and service providers.

5. Legislative and Regulatory Compliance

This policy document is prepared in accordance with the provisions of the:

- Constitution of the Republic of South Africa, Act 108 of 1996, amended;
 - *In particular, section 6 and 9.*
- Use of Official Languages Act, Act 12 of 2012; and
 - *More especially the provisions outlined under section 4.*
- Regulations in terms of Section 13 of the Use of Official Languages Act, Act 12 of 2012.

Chapter 2 Policy Statement

6. Principles

As a basis for this policy, SAST recognises:

- that there are 11 official languages in South Africa and that, together with the South African Sign Language, all official languages must be promoted and have equality of treatment;
- it is committed to the promotion of all languages in the Republic in order to ensure constitutional language equity and language rights, as required by a democratic dispensation;
- that multilingualism must be recognised as a resource to maximize collaborative partnerships in nation building, economic development and social cohesion;
- it is required to ensure good language management within the SAST administration and services that meets the needs of the public and ensures equitable access to services and information;
- that it must prevent the use of any language for the purpose of exploitation, domination and discrimination within the SAST;
- SAST facilitates the arts and entertainment and encourages diverse cultural provision, SAST plays a unique and vital role in the promotion and development of all official languages; and
- that as it seeks to present the very best performing arts work from the local communities, Gauteng, the country and from around the world, that language is not only about communication, but also about identity, creativity and respect.

7. Official Language of SAST

SAST has adopted all 11 official languages of the Republic as its official languages for the purposes of this Policy.

8. Use of Official Languages by SAST

The following criteria has been taken into account in arriving at the choice of official languages to be used by SAST:

- Mandate,

- Usage,
- Practicality,
- Expense,
- Regional circumstances, and
- Needs and preferences of the public served.

The following table provides the context within which official languages will be used by SAST:

PART 1: GENERAL GUIDANCE

1.1. Background

The National Energy Regulator (NERSA) requires sufficient and accurate information from regulated entities in order to make well-informed decisions on issues of market demand, competition development, and service quality/availability, financial health of the regulated entities and setting/approval of fair and reasonable tariffs aligned with the public interest.

To gather that information, the Energy Regulator is issuing this Regulatory Reporting Manual (RRM), for implementation by licensees, for purposes of recording and submitting to the Energy Regulator financial and non-financial information regularly in a systematic and consistent way. The goal is to have focused financial and non-financial information relevant to economic regulation to enhance the efficiency and transparency of the regulatory process. The financial information may at times differ from what is contained in statutory financial statements.

The RRM not only provides a uniform system of regulatory reporting by regulated entities, but also requires accounting separation of financial information (also known as ring-fencing) when the regulated entity has other businesses that the Energy Regulator does not regulate or as the Energy Regulator may require separating different activities within a regulated entity.

The RRM's are divided into three sections: Section 1 (or Volume 1) contains general administrative issues and instructions that apply to all entities in the regulated energy industry, Section 2 (or Volume 2, Volume 3 and Volume 4) contains industry specific charts of accounts, activity analysis and reporting templates, and Section 3 (or Volume 5, Volume 6 and Volume 7) contains industry specific non-financial information for the regulated industries and reporting templates.

RRM Volume 1, which is this volume, is divided into two main parts, namely financial information, which is covered under Part 2 of this volume, and non-financial information, which is covered under Part 3.

1.2. NERSA Legislative Mandate to Prescribe Reporting Requirements

In terms of Section 15 of the Electricity Regulation Act, 2006 (Act No. 4 of 2006) ('the Electricity Regulation Act'), Section 21 of the Gas Act, 2001 (Act No. 48 of 2001) ('the Gas Act'), and Section 20 of the Petroleum Pipelines Act, 2003 (Act No. 60 of 2003) ('the

Effective Date: 01 September 2008
Revision Date: 29 September 2016

Petroleum Pipelines Act'), NERSA should prescribe licence conditions to regulated entities that may include, among other considerations, providing the Energy Regulator with required information to perform its functions. Section 21(1) (u) of the Gas Act and Section 20(1) (u) of the Petroleum Pipelines Act provide that, as a condition of licence 'licensees must provide information necessary for the Regulator to perform its functions'. Section 15(1) (b) of the Electricity Regulation Act provides that 'The Regulator may make any licence subject to conditions relating to the furnishing of information, documents and details that the Regulator may require for the purposes of this Act'. Section 20(1)(e) of the Petroleum Pipelines Act also provides that, as a condition of licence, 'the petroleum loading, pipeline and storage activities of vertically integrated companies may be required to be managed separately with separate accounts and data with no cross-subsidisation'. In addition, as a licence condition, the Energy Regulator can prescribe a tariff methodology. A tariff methodology can have implications for account structures.

Pursuant to Section 47 of the Electricity Regulation Act, the Energy Regulator may, after consultation, make rules by notice in the *Gazette* that may relate to the keeping of information, the rendering of returns and the period for and format in which information must be kept, as well as the persons or institutions it must be rendered to.

Pursuant to Section 34 of the Gas Act, after consultation and duly considering public comments, the Minister may by notice in the *Gazette* make regulations regarding, among others, the rendering of information to the Energy Regulator.

Pursuant to Gas Regulation 17(1) (a), a licensee must submit to the Gas Regulator, in addition to any other information required, detailed audited annual accounts consisting of a balance sheet, income statement and cash flow statement for each licensed gas facility and activity.

Pursuant to Section 33 of the Petroleum Pipelines Act, after consultation and duly considering public comments, the Minister must, as appropriate, by notice in the *Gazette* make regulations regarding, among others, the rendering of information to the Energy Regulator.

Section 45 of the Electricity Regulation Act and Section 29 of both the Gas and Petroleum Pipelines Acts grant any person authorised by the Energy Regulator in writing right of entry to inspect, among others, books, accounts or other documents relating to the regulated entity. Furthermore, the Energy Regulator may require any person to furnish to the Energy Regulator with such information, returns or other particulars as may be necessary for the proper application of these Acts. The Energy Regulator may require the accuracy of that information, return or furnished particulars to be verified by way or oath/solemn declaration or require that the licensee ensure that the relevant governance approval process has been followed.

1.3. Regulatory Functions of NERSA

The role of NERSA is to regulate the electricity, piped-gas, and petroleum pipelines industries. The powers and duties/functions of NERSA in terms of Section 4 of all three enabling Acts include, among others, the following:

- ✓ Regulate electricity prices and tariffs; set tariffs for petroleum pipeline operation and approve tariffs for petroleum storage and loading facilities; regulate prices in terms of Section 21 (1) (p) of the Gas Act in the prescribed manner, monitor and approve and if necessary regulate gas transmission and storage tariffs and take appropriate action when necessary to ensure that they are applied in a non-discriminatory manner as contemplated in section 22, and administer the agreement concerning the Mozambique Gas pipeline.
- ✓ Promote competition in the petroleum pipelines and gas industries as well as competitiveness and customer and end user choice in electricity.
- ✓ In electricity, establish and manage monitoring and information systems and a national information system, and co-ordinate the integration thereof with other relevant information systems; gather and store information relating to construction, conversion and operation of petroleum pipelines, loading facilities, and storage facilities; gather information relating to gas production, transmission, storage, distribution, trading, liquefaction, and re-gasification.
- ✓ Licensing in the electricity, piped-gas, and petroleum pipelines industries.
- ✓ Compliance in the electricity, piped-gas, and petroleum pipelines industries.
- ✓ Dispute resolution in the electricity, piped-gas, and petroleum pipelines industries.

To fulfil these functions, NERSA employs a range of regulatory tools, one being Regulatory Reporting, which involves the reporting of both financial and non-financial information to the Energy Regulator (ER) by Licensees.

1.4. Purpose of Regulatory Reporting Manual (RRM)

The purpose of this Regulatory Reporting Manual is to prescribe reporting procedures and requirements in order to achieve uniformity and consistent reporting of elements that are required for tariff setting, monitoring and/or tariff approval, such as: operating and maintenance expenses, capex/asset values, depreciation, taxes, return on investment, compliance as well as profit commensurate with risk. Regulatory Financial Reports as set out in this Manual [1] accommodate financial segregation between regulated activities/products/services in a vertically integrated business, [2] accommodate financial segregation of regulated business from non-regulated businesses, [3] incorporate current legislative requirements, [4] support the adopted regulatory methodologies in the regulated businesses, [5] provide guidance necessary for unbundling cost allocation and rate design,

Effective Date: 01 September 2008
Revision Date: 29 September 2016

and [6] provide consistency of format in regulatory financial reports in the energy sector, whereas the non-financial reports assist in; bringing certainty to non-financial information requirements, providing an adequate information base required by the Energy Regulator, achieving uniformity in measurement, improving transparency and consistency in the regulatory process and enhancing regulatory efficiency. The implementation of the RRM will assist in bringing certainty to regulatory reporting requirements, providing an adequate information base for future price/tariff setting, monitoring the financial health of the regulated entity, monitoring performance and improving transparency in the regulatory process, as well as monitoring compliance and enhancing regulatory efficiency.

Expected benefits from RRM implementation are:

a. Consistency of reported regulatory information

This provides for easier understanding and submitting of tariff applications. The RRM also ensures the information requested for regulatory purposes is submitted correctly and should reduce further information requests. There is value in reporting on a consistent basis from year to year.

b. Comparability of information over time both within and between regulated entities.

It is much easier to compare information when it has been recorded on a consistent basis thereby improving the Energy Regulator's ability to test whether applications and budgets are reasonable. Standardisation allows the development and calculation of metrics and performance measures that can be used for comparison purposes and as a starting point to understanding variations.

c. More complete and comprehensive applications

To a great extent, it will help resolve the issue of how much and what type of information to include in a regulatory application, which in turn will result in reduced information requests. Both the regulated entity and the Energy Regulator will have greater certainty on regulatory reporting requirements.

d. Regulatory efficiencies

It will engender high standards, quality applications on a consistent basis, and better understanding of applications and reduce information requests, leading to greater regulatory efficiency. The RRM will save time spent in hearings by shifting focus from 'what is contained in the application' to 'why'.

e. Monitoring compliance with Energy Regulator conditions/requirements

The regulatory financial reports will allow the Energy Regulator to detect whether the full intentions of their decision have been complied with and whether licence conditions have been complied with.

f. Informing tariff reviews and setting/approving of tariffs

g. Detection of cross-subsidisation and discrimination within businesses, all or part of which are regulated.

1.5. Applicability of Regulatory Reporting Manual (RRM)

The RRM applies to all entities regulated by NERSA and has implications for the regulated entity's affiliates to the extent that there are transactions with the affiliate(s), allocation of cost to/from/between these affiliates and the regulated entity. In this regard, the RRM has been designed for use by:

- a. each regulated entity's accounting, financial and regulatory personnel;
- b. the regulated entity's auditors;
- c. any person appointed by the Energy Regulator to conduct the verifications/inspections envisaged by the Act; and
- d. NERSA regulatory staff.

1.6. Disclaimer

Inclusion of any item or account in the prescribed RRM does not necessarily imply NERSA's acceptance for tariff setting/approval purposes of any expenditure, revenue, or procedure suggested by the use of such account or imply the adequacy of such information to enable the Energy Regulator to make a decision.

Although the implementation of RRM is expected to lead to more complete/comprehensive application filing and thereby reduce information requests, there will still be certain well-justified circumstances when additional information would be required in order to fully clarify a specific aspect of a requested revenue requirement in an application.

PART 2: FINANCIAL INFORMATION

This section of the RRM discusses the general preparation and reporting guidelines for the financial information to be submitted by all licensees to the Energy Regulator.

2.1 General Preparation and Reporting Guidelines

2.1.1 Reporting Currency

The regulatory financial reports must be presented in South African Rand.

2.1.2 Basis of Preparation of Regulatory Financial Reports

The Energy Regulator requires information to perform its functions such as tariff setting/tariff approval and performance monitoring. This information shall be prepared by a regulated entity/licensee and provided to the Energy Regulator, and may differ from that prepared for the statutory financial statements. The purpose of the RRM is to provide guidance on additional details, calculations, content, structure and format of regulatory reporting needed specifically for energy regulation. The Regulatory Financial Reports should therefore be prepared in accordance with these RRM in order to fulfil these information requirements.

2.1.3 Reporting Convention – Historical Cost

The Regulatory Financial Reports should be prepared under the historical cost convention and as specified in the RRM. Where no historical cost information exists, regulatory asset base (RAB) is the deemed historical cost at the commencement of economic regulation as explained in the following paragraph.

Use of historical costs requires information dating back to when the oldest assets in service were first commissioned. For long-lived pipeline assets, this may be some time ago, and the relevant information may not be readily available. In the same vein, some electricity lines businesses' asset registers may be incomplete or/and incorporate inconsistent assumptions about depreciation. To address these limitations, the Energy Regulator may make specific decisions in this regard to determine a vesting RAB of the assets in question. This is expected to be a once-off valuation at the start of economic regulation. A form of modified historical cost valuation approach or trended original cost, taking into account the estimated remaining useful life, will be applied to determine the vesting RAB of the affected long-lived assets. The so determined vesting RABs become the proxy for historical cost going forward.

Effective Date: 01 September 2008
Revision Date: 29 September 2016

2.1.4 Reporting Convention – Fair Value Accounting (FVA)

Fair Value Accounting (FVA) is added as an alternative to historical cost. The inclusion of FVA is to accommodate the replacement cost methodology. The use of the FVA should be in line with the relevant methodology in consultation with the Energy Regulator. However if the licensee is using historical cost (as is the case currently with most licensees) there is no need to revalue (i.e. FVA), unless methodology requires it.

2.1.5 Reporting Convention – Accrual Basis

The regulatory financial reports should be prepared on an accrual basis.

2.2 Cost Allocation and Separation Principles

The allocation (assignment and attribution) of costs should ensure that separation and no cross-subsidisation occurs between regulated and non-regulated lines of business and between regulated businesses themselves, products or services. The cost of each activity should be distributed among the business units based on direct assignment when possible, and based on cost drivers when not. The allocation methodology should adhere to the principles listed below.

2.2.1 Causality

Causality means there is a causal relationship between the cost driver and the costs incurred in performing the activity. Revenues, costs, assets and liabilities must be attributed in accordance with the activities that cause the revenues to be earned or costs and liabilities to be incurred or the assets to be acquired.

Where cost causation cannot be easily ascertained or established, cost drivers should be selected based on benefits received.

2.2.2 Objectivity

The attribution methods should be objective, prevent cross-subsidisation and ensure equitable cost sharing among the entity's regulated businesses, non-regulated business and its affiliates without unduly benefiting any of them.

2.2.3 Consistency

The attribution/allocation methods should be consistent from year to year. Where there are changes to the methodology, the regulated entity should restate the previous year's (or any other applicable comparative figures') regulatory financial reports to reflect the impact of the changes.

2.2.4 Transparency

The attribution method should be transparent. All direct and allocated costs, revenues, assets and liabilities separately distinguishable from each other should be traceable on the accounting records of the regulated entity to the applicable regulatory financial reports submitted by the entity.

2.3 Cost Allocation and Separation Methodology

2.3.1 Methodology Overview

The regulated entities should adopt the fully allocated cost approach (sum of direct cost plus a share of indirect costs) whereby direct costs are assigned directly to the product/services while indirect costs are traced to an activity centre or cost pool from where the primary cost driver or relevant proxy must be identified and used to allocate the costs between regulated and non-regulated lines of business, products or services.

One of the fundamentals behind the fully allocated cost approach is to eliminate arbitrary cost allocations and instead use cost drivers, work orders and other such instruments to ensure to the maximum extent possible direct assignment.

2.3.2 Fully Allocated Cost Approach

The fully allocated cost approach entails two steps to distribute costs among business units:

1. Direct Assignment
2. Allocation based on a Cost Allocator

1. Direct Assignment

Direct Assignment should be applied when the portion of an activity used by a business unit can be reasonably established. Direct assignment is preferable to Allocation because it is based on a more direct relationship.

Effective Date: 01 September 2008
Revision Date: 29 September 2016

2. Allocation based on a Cost Allocator

Allocation will apply where more than one business unit uses an activity, but the portions of the activity that each uses cannot be directly established. In this case, a cost driver must be identified and a cost allocator assigned to distribute the costs of the activity. A cost allocator is a formula for sharing the cost of an activity among those who cause the cost to be incurred according to the causality principle mentioned above.

It is acknowledged that some amount of cost allocation is unavoidable. However, best practice suggests that when it comes to cost allocations, less is better. Therefore allocations will only be allowed when there is no other feasible alternative for direct assignment.

Clearing accounts may be used for indirect costs that are to be allocated to more than one account, from which they are then allocated on a determined cost-drivers basis. The clearing accounts must be zeroed at the end of each regulatory reporting period of the regulated entity.

The cost allocation method, affiliate transactions and transfer pricing policies should be documented in the form of a Cost Allocation Manual (CAM) and reviewed regularly to reflect any changes in cost relationships and cost allocators/cost drivers. The CAM should be approved by the Energy Regulator as specified in this Manual.

Discussions of activity analysis for each of the three regulated businesses are found in the respective industry specific manuals (see Volume 2, Volume 3 and Volume 4).

2.4 Affiliate Transactions and Transfer Pricing Policies

2.4.1 Overview

The basic principle to govern transactions between the regulated entity and affiliates and/or between business divisions, whether carrying out regulated activities or not, is that only costs relating to the operation of the licensed activity are allowed for tariff-setting/approval and other regulatory purposes. Vertically integrated businesses shall, where required, keep separate accounts for separate business units and shall separate these between regulated and non-regulated businesses. The principal objectives of this separation are to:

1. minimise the potential for a utility to cross-subsidise these activities; and
2. ensure there is no preferential access to regulated entity services.

2.4.2 Affiliate Transactions – Sale price to affiliate

The sale price to an affiliate/division should not be less than fair market value. Where no market value exists, no less than cost-based price should be charged. Cost-based price should follow the RRM cost allocation guidelines. When a regulated product or service is provided, the transaction should be recorded in the regulated revenue accounts at the prevailing approved tariff rate.

2.4.3 Affiliate Transactions – Purchase price from affiliate

Purchases from an affiliate/division should not exceed fair market value. Where no market value exists, payment reflected should be no more than the cost-based price. Cost-based price should follow RRM cost allocation guidelines. When a regulated product or service is received, the transaction should be recorded in the regulated expense accounts at the prevailing approved tariff rate.

2.4.4 Asset transfers

The regulated entity should sell assets to an affiliate/division at no less than Net Book Value (NBV), and the Regulated entity should buy assets from the affiliate/division at no more than NBV. For public entities, there may be cases where the National Treasury may prescribe the values at which a regulated public entity should buy, sell or transfer assets. If such values prescribed by National Treasury are derived on an historical cost basis or, where original cost are not available, on a modified historical cost basis, then those values may become the Regulatory Asset Value (RAV) at the commencement of economic regulation.

2.4.5 Shared Services Joint Costs

To the maximum extent possible, shared costs should be assigned directly to licensees/affiliates on the basis of causation or usage, and where cost causation cannot be easily ascertained or established, cost drivers should be selected based on benefits received.

A key element is to ensure that transactions are at arms-length. Market testing is usually used to determine that an at arm's length transaction is taking place. An at arm's length contract like a Service Level Agreement (SLA) should be entered into. Wide market tendering [every three years or as specified by the Public Finance Management Act (PFMA), Municipal Finance Management Act (MFMA) or industry best practice] should be used to ensure competitive inter-business/division charging. Where no market exists, allocation of shared costs should use a reasonable method for a fair and equitable split as envisaged in the RRM on cost allocation and transfer pricing.

Effective Date: 01 September 2008
Revision Date: 29 September 2016

2.4.6 Loans

The interest charges between a regulated entity and its affiliate should be based on the regulated entity's fully allocated cost of debt derived as the sum of actual cost plus an allocated treasury function cost, using a cost driver selected on the basis of 'benefit received'. However, where the regulated entity's fully allocated cost of debt is lower than the prevailing interest rate that the affiliate can obtain elsewhere, the higher rate should be used by the regulated entity to calculate interest charges to the affiliate.

2.4.7 Disclosure requirements for Affiliate¹ Transactions

The regulated entity should keep its accounts and records of all affiliates' transactions that are material in nature so as to be able to furnish accurate and expeditious reports of all transactions with affiliates. The reports are required to show:

- a. an explanation of affiliate relationship, detailed description of nature and purpose of transactions with affiliate entity;
- b. the total amounts involved;
- c. a breakdown of the charges to and from each affiliate clearly split between Operating Expenditure (opex) (excluding depreciation), depreciation, capital expenditure (capex) and revenues etc. – this breakdown should clearly indicate the amounts included in each account prescribed in the RRM with respect to such transactions; and
- d. any other info about affiliate transactions necessary for an understanding of the financial statements, e.g. disclose those affiliate transactions valued at fair market value, tariff rates, and those valued using fully allocated cost-based recovery.

However there are instances where the Energy Regulator may waive disclosure of information about transactions between public/government entities where the transactions are consistent with normal operating relationships between the entities, and are undertaken on terms and conditions that are normal for such transactions in these circumstances.

¹ See under Terminology point number 1, definition of Affiliation.

2.5 Audit of Regulatory Financial Reports

2.5.1 Role of the Auditor in Regulatory Financial Reports

An independent audit of the regulatory financial reports enhances the quality, objectivity, and credibility of the regulatory financial reports for the Energy Regulator's and other stakeholders' use.

2.5.2 Appointment of Auditors for Regulatory Financial Reports

Section 45 of the Electricity Regulation Act and Section 29 of both the Gas and Petroleum Pipelines Acts grant any person authorised by the Energy Regulator in writing right of entry to inspect, among others, books, account or other documents relating to the regulated entity found thereat. Furthermore, the Energy Regulator may require any person to furnish to the Regulator such information, returns or other particulars as may be necessary for the proper application of these Acts. The Energy Regulator may require the accuracy of that information, return or furnished particular be verified by way or oath/solemn declaration. Such an oath/solemn declaration shall be done by the responsible official that would normally sign the audited statutory accounts for the entity or, in the case of a Municipality, by the Municipal Manager, and shall constitute part of the regulatory financial statements being audited.

Annual Regulatory Financial Reports must be audited at the same frequency as, and preferably by the same auditors that are auditing, the regulated entity's statutory accounts. Using the same auditors will be more cost-effective as the auditors already have knowledge of the regulated entity's business and would avoid duplicating some of the work performed for statutory audits. Using the same auditors may also enhance the timeliness of regulatory reporting. However, this would not preclude the Energy Regulator from appointing an auditor, in terms of Section 45 of the Electricity Regulation Act and Section 29 of both the Gas and Petroleum Pipelines Acts to audit the Regulatory Financial Reports, where the Energy Regulator deems it appropriate to use a different auditor from the regulated entity's incumbent auditors.

2.5.3 Form and Content of Auditor's Engagement Letter

There will be an Engagement Letter between the Energy Regulator and the Auditor as contemplated in Section 45 of the Electricity Regulation Act and Section 29 of both the Gas and Petroleum Pipelines Acts.

The Engagement Letter between the Energy Regulator and the auditor may specify the duty of care the auditor owes the Energy Regulator and require the auditor to carry out the audit with due consideration of the objectives of the Energy Regulator as contemplated in the

Effective Date: 01 September 2008
Revision Date: 29 September 2016

enabling Acts. The Engagement Letter may also clarify the position on issues related to unique needs for economic regulation in line with the RRM, and the communication process between the auditor, the regulated entity being audited and the Energy Regulator.

2.5.4 Scope of the Audit

The audit of regulatory financial reports is to be performed in accordance with the International Standards on Auditing or, in the case of public entities and municipalities, as prescribed by the Auditor General. The regulatory reports audited would have been prepared in accordance with the RRM.

The licensee must grant the auditor unlimited access to the accounting and other records, as well as any such information and explanations required for the purposes of the regulatory financial reports audit.

2.5.5 Materiality and Audit Framework of Specialised Areas

In a situation where the materiality level used for the audit of group level statutory accounts may be significantly larger than its individually licensed activities to the extent that transaction tests will not sufficiently test regulatory financial reports items, the auditor should conduct further transaction testing for the regulatory financial reports beyond that already performed for statutory accounts. The transaction testing on regulatory financial reports should, as a minimum, be equivalent to that performed on statutory accounts as if the auditor were only engaged to audit the regulatory financial reports.

Appendix 1 as attached to this RRM shows some of the specialised high-level areas that may constitute part of the scope of the audit for regulatory financial reports. The actual scope of the audit is to be discussed between the licensee and the Regulator at the time when the audit takes place.

2.5.6 Audit Opinion

The audited regulatory financial reports will be addressed to the Energy Regulator. The auditors will express an opinion on whether the annual Regulatory Financial Report has been prepared in all material respects in accordance with the RRM.

2.5.7 Cost of the Audit

The regulated entity being audited will bear all the audit costs with provision that such costs may be recovered from tariffs.

Effective Date: 01 September 2008
Revision Date: 29 September 2016

2.6 Administrative Issues

2.6.1 Required Regulatory Financial Reports

These half-year regulatory financial reports need not be audited.

Annual Regulatory Financial Reports

The annual (full-year) Regulatory Financial Reports should provide annualised comparatives in columns of: [a] current year actual against immediate previous year actual, and [b] estimates (projections) as used in NERSA's revenue decision as the basis upon which to set/approve revenue/tariffs. The annual (full-year) Regulatory Financial Reports shall include the following:

- a. balance sheet (statement of financial position);
- b. statement of retained earnings (statement of changes in net assets);
- c. income statement (statement of financial performance/comprehensive income);
- d. statement of changes in financial position (statement of cash flow);
- e. commentary explaining the financial statements, which should include:
 - i. a comparison between actual current period results and assumption made during tariff application/approval,
 - ii. an explanation of variances between current period actual results, the results of the previous year and the assumptions made in setting/approving tariffs,
 - iii. a discussion of the results against the plan and an outline of the forward plans for key business drivers such as capex, financing arrangements, organisational shape, operational performance, etc.,

- iv. a formal statement from the directors of the licensee that the licensee has complied with licence obligations and that licensee has not cross-subsidised or discriminated,
 - v. detailed disclosure of basis of preparation of regulatory financial reports,
 - vi. a discussion of asset valuation basis and depreciation,
 - vii. detailed cost attribution, cost allocation and inter-affiliate business charges,
 - viii. reconciliation between information in the regulatory financial reports and statutory accounts, and
 - ix. the entity's statutory accounts with their supporting documents or/and notes;
- f. a signed declaration to the effect that the information presented is complete and accurate and complies with the RRM, which shall be signed by a suitable official that normally signs the statutory accounts for the entity, or the Municipal Manager in the case of a Municipality or as per the Licensee's relevant Governance approval process; and
- g. other surveillance/monitoring reports that NERSA may specifically request for the ongoing evaluation of performance, tariffs, revenues, etc.

The annual regulatory financial reports shall be audited. Estimates used in tariff setting/approval should be included in the Regulatory Financial Reports, but would not be subject to an audit. However, the Energy Regulator may specify in the Engagement Letter for the auditor to verify that the same estimates (projections) as used in NERSA's revenue decision as the basis upon which to set/approve revenue/tariff are replicated in the comparative column for estimates of the Regulatory Financial Reports.

2.6.2 Cost Allocation Manual (CAM)

Unless otherwise exempted by the Energy Regulator, each licensee is also required to submit to the Energy Regulator a Cost Allocation Manual (CAM) for approval, as soon as the RRM is approved for implementation and before the licensee makes its first filing to the Energy Regulator under the RRM. Regulated entities so exempted from submitting their own Cost Allocation Manual will be required to adopt a standardised CAM provided by the Energy Regulator. Thereafter, a licensee is only required to submit an updated CAM to the Energy Regulator whenever the licensee reviews and updates the CAM.

2.6.3 Accounting Period

Each regulated entity shall maintain its accounting records on an ongoing basis. For each regulatory reporting period, all transactions applicable thereto shall be entered in the accounting records of the regulated entity. Amounts applicable or assignable to specific business divisions shall be segregated for each regulatory period. Each regulated entity shall

Effective Date: 01 September 2008
Revision Date: 29 September 2016

close its accounting records at the end of each financial year. This financial year end date should align with annual dates used in the tariff application for ease of analysis and monitoring.

The Energy Regulator may specify other allowed accounting periods to cater for specific dispensations as deemed appropriate to ensure the regulatory reporting burden is not unnecessarily onerous.

2.6.4 Records

Each regulated entity must keep its books of accounts, and all other records supported by detailed information as will permit ready identification, examination, analysis and verification of all facts thereto. All amounts included in the accounts for capex and opex as well as any payments disallowed by the Energy Regulator shall be tracked separately within each account prescribed by RRM. The records shall be filed in such a manner as to be readily accessible for examination by authorised representatives of the Energy Regulator. These records must be retained by the licensee for at least five years.

2.6.5 Account Numbering System

Regulated entities should use account numbers and descriptions as provided in this RRM. Where it is not possible to use the account numbering system prescribed in the RRM, the regulated entities may opt to use a different system of account numbers for its own purposes, provided that a list of these account numbers is kept readily available together with a reconciliation of such account numbers with the numbers provided in this RRM. In this context, all submissions/applications/correspondence to the Energy Regulator must be referenced to in terms of the account numbering provided in this RRM.

2.6.6 Reporting Timeframe

Half -Year Regulatory Financial Reports (for monitoring) should be submitted within 60 days of the end of the licensee's half-year reporting period.

Annual Regulatory Financial Reports should be submitted within four months of the financial year end of the licensee.

All submissions of Regulatory Financial Reports must be in an electronic format for all documents. Electronic copies must include PDF and MS Excel files for materials that will form a permanent record, with the Excel files being for all financials. Any MS Word files made

Effective Date: 01 September 2008
Revision Date: 29 September 2016

available to the Energy Regulator will function as working copies for all parties to readily extract and analyse information. A hard copy should also be provided that will serve as a master copy.

2.6.7 Prior Period Restatement

An important tool that the Energy Regulator uses in assessing a licensee's application is the comparison of actual results to prior year and/or forecasts. In order to permit this comparison, it is imperative that the forecasts, prior year and current period actual figures be recorded and reported on a similar basis. If licensees find themselves in a situation where the forecasts/prior year and actuals are prepared on a different basis, the licensee must restate, on an account-by-account basis, the forecasts/prior year in order to provide meaningful comparisons.

2.6.8 Publication and Confidentiality

Section 8(9) (a) and Section 10(2) of the National Energy Regulator Act, Section 29 of the Gas Act and Section 29 of Petroleum Pipelines Act contain specific provisions on confidentiality of information.

The regulatory financial reports may be published on the Energy Regulator's website, but would exclude certain information contemplated in Sections 8(9) (a) and 10(2) of the National Energy Regulator Act, Section 29 of the Gas Act and Section 29 of the Petroleum Pipelines Act, determined to be confidential by the Energy Regulator. It is the responsibility of the regulated entity to promptly notify the Energy Regulator of information that should not be in the public domain by clearly marking the relevant information as such. Regulated entities are also encouraged to publish the regulatory financial reports on their respective websites.

The Energy Regulator shall only share the publicly available Financial and Non-Financial Information with any person as defined in the Promotion of Access to Information Act, 2000 (Act No. 2 of 2000).

2.6.9 Implementation Costs and Timelines (Effective Date) of RRM

The RRM is effective from the date it is gazetted.

Regulated entities are required to report according to the RRM for all submissions to be made to NERSA from June 2009, although NERSA also will encourage those regulated entities that are able to comply with and report in accordance with RRM to do so immediately.

Effective Date: 01 September 2008
Revision Date: 29 September 2016

Each implementing licensee will be required to submit to the Energy Regulator an 'RRM Implementation Cost Estimates and Implementation Plan' for approval and also to enable the regulated entity to claim the approved Implementation Costs from tariffs. In approving the submitted Cost Estimates and Implementation Plan, the Energy Regulator will take into consideration, among others, [1] the Overall Approach, [2] Project/Work Plan, [3] Feasibility of the Solution Proposed, [4] Compliance with RRM (and especially demonstrate more direct cost assignments and minimise cost allocations), [5] Budget/Cost Containment, [6] Risk Management, and [7] Whether it is a new implementation or a customisation.

NERSA may consider categorising regulated entities and set staggered compliance dates according to regulated entities' implementation capacity. Such a categorisation will take into account licensees' different starting points, including licensees with experience in regulatory reporting vs new or future licensees, the learning period for both the Energy Regulator and licensees, different enterprise resource planning (ERP) systems whereby some can more easily implement the RRM, different costing systems like activity based costing (ABC) vs traditional, time to amend licence conditions if necessary, and entities that have multi-year filing applications/dispensations.

2.6.10 Review and Modification of the RRM

The Energy Regulator will consult with regulated entities on an ongoing basis to ensure the objectives and requirements of the RRM are being met. To maintain uniformity of reporting, the licensee should submit questions of doubtful interpretation to the Energy Regulator for consideration and decision. The Energy Regulator will be responsible for advising licensees on the interpretation and application of the RRM. All interpretations issued by the Energy Regulator will be posted on the frequently asked questions (FAQ) section of the Energy Regulator's website. The Energy Regulator will also entertain detailed annual feedback from the regulated entities on aspects of the RRM that are working well and areas that need amendment, with suggested amendments. The Energy Regulator will publish feedback/comments with the response in the FAQ section of its website.

The Energy Regulator will continuously conduct formal reviews of the content of this RRM every five years to ensure that the contents of the RRM reflect the regulatory circumstances existing at the time of the review. The Energy Regulator also recognises that special circumstances may arise that may necessitate ongoing changes, perhaps more frequently than the envisaged five-year formal review cycle. This provision would therefore not preclude on-going incorporation by the Energy Regulator of justifiable changes that are considered necessary to immediately capture clarity, transparency and regulatory efficiency benefits.

The Energy Regulator will make decisions on the interpretation of the various clauses of the RRM, but any party will be entitled at any stage to take decisions of the Energy Regulator on review or appeal as contemplated in the enabling legislations.

Effective Date: 01 September 2008
Revision Date: 29 September 2016

PART 3: NON-FINANCIAL INFORMATION

This section details a high-level discussion on the Non-Financial Information (NFI) Manuals of the RRM's. As discussed in section 1.4 of this RRM volume, the NFI Manuals will assist in bringing certainty on non-financial information regulatory reporting requirements, provide an adequate information base required by the Energy Regulator and improve transparency in the regulatory process. The NFI Manuals apply to the Electricity Supply Industry (NFI Volume 5), Piped-Gas Industry (NFI Volume 6) and Petroleum Pipeline Industry (Volume 7). A detailed discussion on the NFI requirements per industry is contained in the industry specific NFI Manuals mentioned above.

3.1 NFI Categories

The non-financial information is grouped into two categories, namely static (initial) information and dynamic information.

3.1.1 Static Information

Static information is the NFI that has already been collected by NERSA (once off) from the licensees at the time of licence application. Static information may include information such as installed capacity, licence number and power station name. Licensees should therefore note that, after licensing, static information will not be collected again while it remains unchanged from what was originally submitted to the Energy Regulator. The static information section is included in the different industry specific NFI Manuals in order to amalgamate all NFI required/used or in the possession of NERSA into one point of reference. This amalgamation makes the Manual a complete single source of reference of NFI in order to engender regulatory efficiency for all the users of the NFI Manual identified in section 1.5 of this Manual.

3.1.2 Dynamic information

Dynamic information is the NFI that changes more regularly while the licensee is in operation. Dynamic information may include information such as volume sent out and fuel volume used. Dynamic information will be collected from the licensees periodically, for example daily, weekly, monthly, quarterly, annually or on the licence anniversary date, as the case may be. The dynamic information is the core of the NFI Manuals and form the basis from which the Energy Regulator will derive the performance and compliance monitoring metrics illustrated by way of examples in the later parts of the three NFI Manuals (namely Volumes 5, 6 and 7).

3.2 Measurements/Calculations

3.2.1 Units of measurement

The units of measurement shall be in metric (Electricity and Petroleum Pipelines industries) or both metric and non-metric for the Piped-Gas industry.

3.2.2 Measurements and calculations

Each industry's NFI contains a section that defines the information or items that are subject to different interpretations of measurement approaches to enable NERSA and the regulated industries to adopt one standard measure.

3.3 Responsibility for NFI Submission and Solemn Declaration

The NFI must be submitted to the Energy Regulator by a responsible official appointed from time to time and duly authorised by the licensee to submit this information to the Energy Regulator. The Energy Regulator may require that this duly authorised responsible official verify the accuracy of the NFI being submitted by way of oath/solemn declaration.

The NFI must be submitted electronically or in any other format agreed upon between the Energy Regulator and the licensee.

3.4 Record Keeping

Each regulated entity must keep records supported by detailed information that will permit identification, examination, analysis and verification of all facts thereto. The records shall be kept in such a manner as to be readily accessible for examination by authorised persons at least every five years or as per the National Archives of South Africa Act, 1996 (Act No. 43 of 1996).

3.5 Audit of NFI

As discussed in section 1.2 of this RRM, the Energy Regulator may audit the NFI submitted by the licensee for its accuracy if deemed necessary.

3.6 Publication and Confidentiality of Information

The Energy Regulator may publish the non-financial information submitted by licensees on its website, but such publication will exclude information determined to be confidential as contemplated in Sections 8(9) and 10(2) of the National Energy Regulator Act, 2004 (Act No. 40 of 2004), Section 29(4) of the Gas Act, Section 29 of the Petroleum Pipelines Act and determined to be confidential by the Energy Regulator. It is therefore the responsibility of the regulated entity to promptly notify the Energy Regulator of information that should not be in the public domain by clearly marking the relevant information as such. Regulated entities are also encouraged to publish the non-confidential NFI on their respective websites.

The Energy Regulator shall only share the publicly available NFI with any person as defined in the Promotion of Access to Information Act, 2000 (Act No. 2 of 2000).

3.7 Effective Date and Implementation Costs

The implementation phase will be for a period of at least three years starting from 01 April 2016. This three-year period is to enable the licensees to prepare, transition and start reporting according to these NFI Manuals for all non-financial information submitted to NERSA.

The Energy Regulator may also approve a phased implementation to provide for any other justifiable circumstances that may warrant such an approach. Licensees are required to make appropriate arrangements to comply with the prescript and guidance contained in these NFI Manuals.

Costs related to reporting in accordance with this NFI Manual should be treated in a similar manner and recovered in a similar way as the licensee's other operating and maintenance expenses for the licensed activity.

Licensees are allowed to report on the NFI using an MS Excel spreadsheet for a period of at least three years (implementation phase). Thereafter the ER may consider using an automated system.

3.8 Review and Modification of the NFI Manual

The Energy Regulator will conduct an initial formal review of the content of these NFI manuals within three years of being approved by the Energy Regulator and being implemented.

Effective Date: 01 September 2008
Revision Date: 29 September 2016

Subsequent reviews will be done every five years to ensure that the contents of the NFI Manuals reflect the legislative and regulatory circumstances existing at the time of the review.

The Energy Regulator also recognises that special circumstances may arise that may necessitate ongoing changes, perhaps more frequently than the envisaged five-year formal review cycle. This provision would therefore not preclude on-going incorporation by the Energy Regulator of justifiable changes that are considered necessary to immediately capture clarity, transparency and regulatory efficiency benefits.

The Energy Regulator will provide decisions on the interpretation of the various clauses of NFI, but any party will be entitled at any stage to take decisions of the Energy Regulator on review or appeal as contemplated in the enabling legislation.

1. INTRODUCTION

- 1.1 South Africa is a multicultural society that is characterised by its rich linguistic diversity. Language is an indispensable tool that can be used to deepen our democracy and also contribute to the social, cultural, intellectual, economic and political life of South African society.
- 1.2 The country's linguistic landscape changed dramatically after the advent of democracy in 1994, when the constitution provided a legal and regulatory framework for the former recognition and promotion of linguistic diversity. The current multilingualism dispensation allows for the former marginalised languages to flourish.
- 1.3 Section 6 of the Constitution guarantees equal status to 11 official languages, namely Afrikaans; English; isiNdebele; isiXhosa; isiZulu; Sepedi; Sesotho; Setswana; Siswati; Tshivenda and Xitsonga.
- 1.4 By fostering equitable access to government services, knowledge and information as part of its constitutional and moral obligation, the Department of Transport actually ensures redress for the previously marginalised languages, which have since been given an official status.
- 1.5 Section 4 (1) of the Use of Official Languages Act 2012, (Act no 12 of 2012) provides that every national department, national public entity and national public enterprise must adopt a language policy on its use of official languages.

3. PURPOSE

The purpose of this policy is intended to set out how the Department will use the official languages of South Africa to communicate effectively with the public and other stakeholders.

4. LEGISLATIVE MANDATE

- 4.1 Constitution of the Republic of South Africa, 1996
- 4.2 The Use of Official Languages Act, 2012 (Act No. 12 of 2012)
- 4.3 Regulations in terms of section 13 of the Use of Official Languages Act, 2012
- 4.4 National Language Policy Framework, 2003

5. Regulatory context of the Policy

- 5.1 This policy has been developed to comply with section 4 (1) of the Use of Official Languages Act, 2012 (Act No. 12 of 2012). The section 4(1) requires every national department, national public entity and national public enterprise to have a language policy on its use of official languages.
- 5.2 It is important to note that this policy is part of a process of working towards multilingualism. While the Department is in favour of encouraging linguistic diversity, this is not its core business, and financial constraints will mean that it will have to find a balance between the language preferences and needs of its target audiences (internally and externally) and financial considerations. However, it is hoped that the departmental financial conditions will in the future make it possible for the Department to make more funds available and make a bigger contribution to the national effort.

6. Mandate of the Department of Transport

- 6.1 The Department of Transport's vision is to position transport as the heartbeat of economic growth and social development in the country. Its mission is to lead the development of efficient integrated transport systems by creating a framework of sustainable policies, regulations and implementable models to support government strategies for economic, social and international development.
- 6.2 The Department is a national department that has public entities which are a critical pillar in the Department's service delivery agenda.
- 6.3 The Department of Transport's direct communication with the general members of the public is limited. Most of its communication is with the public entities, the provincial government departments responsible for transport functions and municipalities, where English is accepted as the language of common usage. However, the Department is still working towards broader engagement with the general members of the public.
- 6.4 Most of the Department of Transport's work is implemented through the public entities that report to the Minister of Transport, namely, the Passenger Rail Agency of South Africa (PRASA), the Railway Safety Regulator (RSR), the South African National Roads Agency Limited (SANRAL), the Road Accident Fund (RAF), the Cross Border Road Transport Agency (CBRTA), the Road Traffic Management Corporation (RTMC), the Road Traffic Infringement Agency (RTIA), the South African Civil Aviation Authority (SACAA), the Airports Company of South Africa (ACSA), the Air Traffic Navigation Services (ATNS), and the South African Maritime Safety Authority (SAMSA).
- 6.5 As far as multilingualism is concerned, the PRASA, RSR, RTMC, RAF, and RTIA are the public entities that do the most important work in raising public awareness of safety in rail and road transport, and should therefore be

encouraged to increase its communications in all official languages other than English.

7. Official Languages of the Department of Transport

7.1 Owing to the mandate of the Department, and the public entities reporting to the Minister of Transport, the official language of the Department is English, and is to be used in all official correspondence.

7.2 The five other languages selected for official use are Afrikaans, isiZulu, Sepedi, Tshivenda and Xitsonga. According to the 2011 census the isiZulu and Sepedi are the widely spoken languages in the two biggest language groups (Nguni and Sotho) and Afrikaans is the language of the majority in provinces such as the Northern Cape and Western Cape whilst Tshivenda and Xitsonga are severely marginalised languages as they do not fall within language groupings.

8. Use of the Official Languages Selected by the Department of Transport

8.1 Owing to financial constraints, the Department's language policy will focus on functional multilingualism, i.e. finding a balance between financial considerations and the need to ensure effective communication of particular messages to particular target audiences.

8.2 For inter and intra-governmental communication, the Department of Transport will use English as the official language of business.

8.3 If a member of the public communicates in writing with the Department, in a specific language, then they will be answered in that language. However, the human and financial resources will be taken into consideration.

8.4 Official publications intended for public distribution (notices, advertisements, forms and other documents) will be translated into other official languages (Afrikaans, isiZulu, Sepedi, Tshivenda and Xitsonga) of the Department.

However this will also depend on availability of human and financial resources.

- 8.5 Calls for nominations for the boards of the Department's public entities will be published in English, as the operations of the boards will be conducted in English, and the members (e.g. engineers, etc.) serving on the boards will be familiar with English.
- 8.6 Reports and/or publications such as the annual report will be published in English, owing to the cost of translations, additional layout and printing. Executive summaries will be made available in other official languages such as Afrikaans, isiZulu, Sepedi, Tshivenda and Xitsonga.
- 8.7 The Promotion of Access to Information Manual will be translated into the selected official languages of the Department and Braille.
- 8.8 Members of the public whose language of choice is South African Sign Language will be accommodated by hiring a professional service provider (PSP) that renders interpreting services, as most of the Department's communications with the public are written. However, this will depend on the availability of the budget to do so.
- 8.9 Signage and branding will be produced in English only.

9. Complaints Mechanism

- 9.1 Anyone who is aggrieved or dissatisfied with an aspect of the language policy may lodge a complaint, which will be dealt with in terms of Regulation 2(2) and 2(3) of the Use of Official Languages Regulations.
- 9.2 The complaint must be lodged in writing, within three months of the complaint arising, and provide the name, address and contact information of the person who lodged the complaint.

- 9.3 The complaint may be delivered to the Director-General of the Department of Transport in any of the following ways-
- 9.3.1 hand delivery to 159 Struben Street, Forum Building, Department of Transport, Pretoria;
 - 9.3.2 via registered post to Private Bag X193, Pretoria, 0001; and
 - 9.3.3 via email to:
- 9.4 The Director-General or his/her delegate may request additional information from the complainant or a meeting to discuss the complaint.
- 9.5 The Director-General will consider the complaint, make a decision and inform the complainant of the decision in writing no later than three months after receipt of the complaint.
- 9.6 Should the complainant not be satisfied with this decision, he/she may lodge an appeal with the Minister. This must be done within one month of the decision referred to in par. 8.5, and the Minister will make a decision no later than three months after receipt of the complaint, and inform the complainant of the decision in writing.

10. Access to the Department of Transport Language Policy

The language policy will be published in the *Government Gazette* in English, and translations will be made available on the Department's website in Afrikaans, isiZulu, Sepedi, Tshivenda and Xitsonga.

11. Review of Policy

This policy will be reviewed whenever the need to do so arises. However, it will be appropriate to review it at least every five years of the new administration.

12. Deviation from the policy

There is no official who has been nominated to approve deviations from this policy hence there will be no deviations allowed.

13. Record Keeping

All official documents of the department shall be placed on record in English and where applicable filed with its translated and/or adapted version.
