DEPARTMENT OF WATER AND SANITATION

NO. 1220

13 NOVEMBER 2020

MZIMVUBU-TSITSIKAMMA WATER MANAGEMENT AREA (WMA 7) IN THE EASTERN CAPE PROVINCE: LIMITING THE USE OF WATER IN TERMS OF SECTION 6 OF SCHEDULE 3 OF THE NATIONAL WATER ACT OF 1998; FOR URBAN, AGRICULTURAL AND INDUSTRIAL (INCLUDING MINING) PURPOSES

I, T Balzer, in my capacity as acting Director-General of the Department of Water and Sanitation (DWS), on reasonable grounds believe that a water shortage exists in certain areas of the Mzimvubu-Tsitsikamma Water Management Area in the Eastern Cape Province, due to insufficient rains in the 2019/20 rainfall season and below average rainfall predictions for the oncoming months, as well as a high water demand, that it is necessary to limit the taking of water from the Algoa Water Supply System (WSS) and other water schemes and dams listed in this gazette.

The Minister of Water and Sanitation may, in terms of section 6 (1) of Schedule 3 of the National Water Act of 1998 (Act 36 of 1998) (The Act) limit the use of water in the area concerned if the Minister, on reasonable grounds, believes that a water shortage exists within the area concerned. This power has been delegated to me in terms of Section 63 (1) (b) of the Act.

Therefore, in my capacity as the acting Director-General of the Department of Water and Sanitation I hereby under delegated authority in terms of section 6 (1) of Schedule 3 read with section 72(1) of the Act, limit the taking and storing of water in terms of section 21(a) and 21(b) of the Act by all users in the geographical areas listed and described below, as follows:

1. The Algoa Water Supply System, its associated primary catchments and its footprint area of supply excluding the Nootgedagt scheme as indicated in table 1:
 - a. Curtailment of overall 30% on all taking of water from surface water resources for domestic and industrial water use from the Algoa WSS and the relevant parts of the primary catchments within which the Algoa WSS occurs;
 - b. Curtailment of 80% on all taking of water from surface water resources for agricultural water use from the Algoa WSS and the relevant parts of the primary catchments within which the Algoa WSS occurs;
 - c. The taking of water from individual sub-systems and dams in the Algoa WSS be limited to the reduced allocations as specified in Table 1;

Table 1: Dams & sub-systems of the Algoa WSS with restricted allocations for 2020/21, (based on operation risk assessments and Algoa WSS Operating Forum meeting decisions of 25th June 2020)

Scheme / Dam	River catchment	Restricted Allocation Availability
Kouga & Loerie Dams Scheme	Kouga River	6.9 million m ³ /a for domestic use (NMBM), 12.06 million m ³ /a for irrigation use, 0.62 Mm ³ /a for domestic use (Kouga LM)
Churchill & Impofu Dams	Kromme River	19.04 million m ³ /a for domestic use (NMBM), 2.84 million m ³ /a for domestic use (Kouga LM) 0.4 million m ³ / for irrigation use.
Nootgedacht Groendal Dam	Sundays River Kwazunga River	No Restriction - for domestic use (NMBM) 5.44 million m ³ /a for domestic use (NMBM) and 0.8 million m ³ /a for irrigation use
Van Stadens, Sand & Bulk Dams	Van Stadens, Sand & Bulk Rivers	3.3 million m ³ /a for domestic use (NMBM)

- d. The taking of water from the groundwater resources listed in Table 2 below for domestic, industrial and irrigation use be restricted by the percentages shown in the corresponding rows in Table 2

Table 2: Groundwater resource restrictions per area

Catchment	Water use	Aquifer	Restriction
Upstream of Kouga, Impofu, Lorie and Groendal dams	Domestic	Whole aquifer	20%
	Agriculture		30%
Downstream of Groendal Dam, Kouga dam, Kabeljous, Swart & Seekoei catchments as well as quaternary catchments M10, M20 and M30	Domestic	Shallow (0-200m)	20%
		Deep (200m+)	0%
	Agriculture	Shallow (0-200m)	30%
		Deep (200m+)	10%
Downstream of Impofu dam	Domestic	Whole aquifer	0%

- e. The Eastern Cape Provincial Head is delegated the power to review the water restrictions, should the Algoa WSS recover adequately as informed by systems models and amend the water restrictions. Should the Algoa WSS or Kouga Dam recover to above 65% before the next decision date on 1 June 2021 the restrictions are deemed to be lifted.
- f. The DWS Eastern Cape Provincial Head is delegated powers to cease any further water supply from the system dams/schemes to an irrigation bulk water user association, irrigation board and/or individual water users once they have depleted their curtailed annual bulk volumes.
2. Other water schemes / dams and catchments affected by drought, listed in Table 3 below:
- a. The taking of water from the water schemes/ dams/ catchments listed in Table 3 below for domestic, industrial and irrigation use be restricted by the percentages shown in the corresponding rows,

Klipplaat System Dams	Klipplaat River	Chris Hani DM	30% for irrigation use
Mhlanga Dam	Mhlanga River	O R Tambo DM	10% of allocation for domestic use

3. The DWS Eastern Cape Provincial Head is delegated the power to individually review the water restrictions, should the dams/schemes in table 3 recover adequately as informed by DWS operating rules, and lift or relax the water restrictions should it happen before the next relevant decision date.
4. The curtailments in points (1) and (2) above are measured against the water allocations / water registrations or water demand of the users as per projected annual water use.
5. The limitation applies to the annual water year commencing 1st June 2020 or from the date of publication of this gazette.
6. All water use sector groups and individuals taking water from any water resource (surface or groundwater) regardless of their authorisation type, in the geographical areas listed and described above in the Mzimvubu to Tsitsikamma Water Management Area, shall install electronic water recording, monitoring or measuring devices to enable monitoring of abstractions, storage and use of water by existing lawful users.
7. All water use sectors groups and individuals taking water from any water resource (surface or groundwater) regardless of their authorisation type, in the geographical areas listed and described above in the Mzimvubu to Tsitsikamma Water Management Area must
 - a. take records of water abstracted on a daily basis;
 - b. establish links with any monitoring or management system designated by the responsible authority;
 - c. submit monthly totals of metered volumes abstracted with effect from 30 days following the date of publication of this notice, in a format specified by the Department and shall continue such recording and reporting data monthly to the Department by the 5th day of each month to *metering.mzitsi@dws.gov.za*

All the affected Water Service Authorities must ensure that all domestic water users, at least, have access to basic water service and that potable water supply to all domestic water users is not completely restricted.

In exercising these powers I have given preference to, the maintenance of the Reserve, treated all water users on a basis, that is fair and reasonable, considered the actual extent of the water shortage, the likely effects of the shortage on the water users, the strategic importance of any water use and any water rationing or water use limitations by a Water Services Institution having jurisdiction in the area concerned, under the Water Services Act 108 of 1997.

Placing limitation on the taking of water use as set out in this notice is an administrative action, affecting the rights of the public as contemplated in section 4 of the Promotion of Administrative Justice Act 3 of 2000 (PAJA). After I have taken into consideration all relevant factors, including those referred to in section 4 (4) (b), I have decided that it is reasonable and justifiable in the circumstances to depart from the requirements referred to in section 4 (1)(a) to (e), (2) and (3) and instituted this limitation without allowing the water users affected and other role players to comment on the matter before I institute the limitation.

PR

This Notice overrides any other previous authorization on water use issued by the Department relating to water users from systems, schemes, dams and catchments specified in this Notice.

BOARD NOTICES • RAADSKENNISGEWINGS

BOARD NOTICE 135 OF 2020**AGRICULTURAL PRODUCE AGENTS COUNCIL
BIOSECURITY RULES FOR LIVESTOCK AGENTS**

It is hereby made known that –

- (a) the rules set out in the Schedule have been made under section 10(b) of the Agricultural Produce Agents Act, 1992, (Act No. 12 of 1992) (“the Act”), read with section 22(2) and (3) of the said Act;
- (b) that the rules shall come into effect on the date of publication hereof in the Gazette.

CF KNOWLES

Registrar of Agricultural Produce Agents' Council.

SCHEDULE**1. BACKGROUND and DEFINITIONS:**

These rules will regulate the livestock agent's industry with specific reference to required precautions to take during the gathering of live animals at auctions to reduce the risk of the spreading controlled, notifiable and other animal diseases.

In summary, each livestock agent/auctioneer will comply with the following:

- a) The rules for auctions in this document.
- b) Registration with the Agricultural Produce Agents Council (APAC) is compulsory and only registered agents will be allowed to conduct business.
- c) Acceptance of responsibilities in terms of Sections 11 and 26 of the Animal Diseases Act, Act 35 of 1984.

- d) An external audit of the auction facilities and all procedures, including these rules for auctions, will be undertaken by an independent auditor, these audits will need to be submitted to APAC bi-annually.
- e) Every livestock agent must appoint a Biosecurity practitioner (a person registered with the South African Veterinary Council).

Definitions

“Agent” means a person who, for the acquisition of gain on his or her own account or in a partnership, in any manner holds himself or herself out as a person who either directly or indirectly advertises that he or she on the instructions of or on behalf of any other person, purchases or sells agricultural produce or negotiates in connection therewith or canvasses or undertakes or offers to canvass a purchaser or seller therefor;

“Arrival area” is an area where animals are held before being allowed into the biosecure area;

“Auctioneer” means a vendor carrying on an enterprise which comprises or includes the supply by him/her the auction of goods as an auctioneer or agent for or on behalf of another person (Section 54(4), Value Added tax Act, Act 89 of 1991);

“Biosecure area” is the area where only animals whose documentation has been verified, identification and health status has been confirmed by a SAVC qualified person, i.e. animals unlikely to pose a significant risk of carrying any contagious disease-causing agents, as well as persons who have been decontaminated to the satisfaction of a biosecurity practitioner are allowed to enter;

“Biosecurity practitioner” a person registered with the South African Veterinary Council, who oversees compliance with minimum biosecurity requirements for animals from different origins congregating for auctioning, in line with the requirements of Sections 11 and 26 of the Animal Diseases Act, Act 35 of 1984 and the rules in this document;

“Animal Owner Health Attestation” is a signed declaration from the owner of the animals that attests:

- The name and location of the farm/area of origin.
- The absence of overt signs of disease and parasites.
- The absence of unexplained mortalities on the property of origin in the preceding 28 days.
- No new animal introductions to the property of origin in the preceding 14 days.
- Where possible, and especially during periods of disease control restrictions in specific localities, confirmation of this health status by the farm's attending veterinarian is ideal, see Addendum A of this document.

“Livestock agent” means an agent acting as such with regard to any agricultural product specified in Part B of Schedule 1 (Act) and for purposes of section 3(1)(b) includes any director of a company, trustee of a trust or a member of a close corporation which acts as a livestock agent as aforesaid.

“Visitor” includes any person at the auction yard e.g. administrative personnel, auctioneers, managers, sellers, owners, buyers, workers, veterinarians etc.

2. OBJECTIVES:

Auction facilities are the second level of detection for animal diseases for animals that are traded through this very critical marketing section of the livestock production value chain and therefore should play a very important role in reducing the spread of animal disease(s) through transactional business activities conducted within the auction facilities. This document aims to establish an auditable and traceable system, while at the same time minimizing the spread of animal disease(s) because of auction activities.

This will be achieved by the specific objectives:

- a) Implementation of a reliable, accurate, and auditable record-keeping system that ensures that all transactions conducted at livestock auctions were carried out in accordance with these reasonable and justifiable rules.

- b) Application of good biosecurity measures to prevent the introduction of diseased animals onto the property and to prevent between-animal spread at a livestock auction.
- c) Prompt and diligent reporting of any suspected controlled or notifiable animal diseases to the relevant state veterinarian.
- d) Commitment to adhere strictly to the prescripts of the following legislation, their regulations, and rules:
 - Animal Diseases Act, Act No. 35 of 1984 and the control measures therein.

- c) Every auction facility must appoint a Biosecurity Practitioner.

6. BIOSECURITY MEASURES AT FARM OF ORIGIN BEFORE MOVEMENT TO AN AUCTION:

- b) A pre-quarantine facility with a crush and proper neck clamp must be available in the arrival area where suspect animals could be examined by a trained assistant for the presence of overt signs of disease and external parasites, prior to being admitted to the Biosecure area.
- c) All animals must, upon arrival, be checked for lesions or clinical signs of disease or external parasites. In addition, animals shall be checked for official marks/brands indicating any of the controlled animal diseases such as Brucellosis, Tuberculosis and Foot and mouth disease. - b) Any instruction of the state veterinarian issued must be adhered to immediately.
- c) Any animals presented at the auction without the proper and necessary documentation at the Arrival area shall not be allowed entry at the Biosecure area at the auction facility. If there is suspicion of animal ownership the animals should

be held back on the vehicle in a dedicated area and be reported to the nearest Stock Theft Unit. However, if delays ensue that threaten the welfare of the affected animals, then they will have to be temporarily offloaded and held in the detainment area while they await said Stock Theft Unit.

- d) The contact details and (after hours details) of the state veterinarian and stock theft units must be available and displayed at the auction premises.
